PRESIDENT’S MESSAGE

Congratulations to the Class of 2001!

Today we celebrate your success. It is a very special day in your life because it represents the completion of an important goal that you had set for yourselves. This is a day to congratulate yourself, a day to celebrate your accomplishments and the fruits of your labor with family and friends. For many of you, this day represents the work and family responsibilities you have had to balance and all the sacrifices you have had to make to carve out time for your studies. Today is a special day when you can stand proud in your achievement.

Today is a time to pause to relish and enjoy the success of your hard work knowing that there will be new goals and new dreams ahead. Learning is a life long commitment, which can only enhance your future success. I urge you to continue to improve your current skills and develop new ones, skills that will ensure your success in this new century, skills that will let you create your own destiny.

We all know that no one reaches their goals without the help and support of others. In saluting your accomplishments today, we must acknowledge the love, encouragement and support of your family members. We also pay tribute to Bronx Community College’s outstanding faculty and staff whose guidance and leadership has nurtured and cultivated this talented class of 2001.

You leave this campus with our best wishes for a bright future. We know that you will continue to make us proud.

Sincerely,

Carolyn G. Williams, Ph. D.

Any BCC student or staff member can submit articles and photographs to the paper. Please send them to us at Colston Hall 605 or use the envelope on the door. Publication is not guaranteed.

It is the policy of the City University of New York not to discriminate on the basis of race, creed, national origin, sex, age or handicapping condition in its educational programs, activities, and employment policy, as required by law. Any BCC pupil who believes he or she has been discriminated against should contact the BCC Affirmative Action Officer in Language Hall Room 31.
**Women's Volleyball Team Finishes Third in Region**

By Donna Genova

The BCC women's volleyball team finished third in the Region 16 Tournament, earning a berth in the National Junior College Athletic Association Region 16 Tournament. The Lady Broncos, coached by Sam Eronosky, won 15-9, 15-12, 15-9 over the Purple Knights of Orange County Community College. They defeated Westchester Community College by the scores of 15-10, 15-7. The last opponent in the regional tournament was the University of Connecticut-Storrs. BCC lost 15-11, 15-10. The Lady Broncos had a good season, finishing with a record of 17 wins and 3 losses. Sophomore Esther Gottron and senior Maria Encarnacion were selected to the All-Region team. This is quite an honor, since there are over 150 players competing in Region 15.

The Lady Broncos started out very strong at the regional tournament by defeating Westchester CC by the scores of 15-10, 15-7. The next opponent was Orange County Community College. The BCC players took control early in the match with some timely spiking and setting and easily won 15-8, 15-7. The last opponent in the pool play was the University of Connecticut-Storrs. BCC had trouble spiking the ball effectively, since the Manhattan played a game that was almost 20 points below the Lady Broncos. They qualified for the regional tournament and played together as a team, giving Nassau CC a tough battle. They hope to advance further in the playoffs next year.

BRONX COMMUNITY COLLEGE

The defending champion Bronx Community College used their home field advantage to the fullest in winning their second straight CUNY Athletic Conference Community College Baseball Championship at Yankee Stadium. The Broncos took a commanding 6-0 lead after the second inning, on their way to a 7-4 seven-inning victory over Kingborough Community College.

Bronx (22-11), who has won the title three of the last four years. The Broncos scored two unearned runs in the bottom half of the first inning after an error on a routine ground out. The Broncos exploded for four more runs in the second inning as Anthony Perez and Daniel DeLeon provided RBI singles and Oscar Lorenzo added a sacrifice fly for another run.

"We feel as this is our Stadium," said BCC head coach Adolpho DeJesus, whose squad came within one game of qualifying for the National playoffs this year.

Michols Pena (McCarther HS/Bronx, NY) was named the game's Most Valuable Player after hurling 6 2/3 innings, yielding only five hits and two earned runs, while striking out eight batters. Sophomore catcher John Arrollo (Walton HS/Bronx, NY) was the hitting star going 3-1 with two runs scored and two RBI's.

COMMENCEMENT 2001
HISTORY OF BRONX COMMUNITY COLLEGE

The establishment of Bronx Community College in 1957 crowned a decade of effort by civic-minded groups in Bronx County to meet the growing need for increased higher education facilities in the “Borough of Universities and Progress.” Classes began with 120 students at Hunter College in February 1959 and moved to the former site of the Bronx High School of Science at Creston Avenue and 184th Street. With Dr. Morris Meister as its first president, the college soon developed into a much-acclaimed comprehensive community college offering a broad range of academic programs.

In April 1961, The City University of New York was created by the state legislature with Bronx Community College as one of its seven constituent undergraduate colleges.

Dr. James A. Colston became the second president of Bronx Community College on August 1, 1966, following Dr. Meister’s retirement. For the next decade, the college grew dramatically, spurred in 1970 by the introduction of open admissions. By 1972, the College was occupying seven additional centers within walking distance of the main building and serving approximately 10,000 matriculated students.

In 1973, the New York State Dormitory Authority acquired the New York University Heights Campus for the use of Bronx Community College. Beginning with the Fall 1973 semester, operations were moved to the present 50-acre site overlooking the Harlem River.

Upon Dr. Colston’s retirement in 1976, Dr. Morton Rosenstock was named Acting President.

On September 1, 1977, Dr. Roscoe C. Brown, Jr., became the third president of the college. During his 17-year tenure, the college intensified its outreach to New York City’s economic and educational institutions through partnerships with business and industry to better ensure the success of graduates. New programs were developed in high growth professions in the fields of health, the technologies and human services.

Dr. Leo A. Corbie was named Acting President after Dr. Brown’s retirement, June, 1993.

Dr. Carolyn G. Williams became the college’s fourth President on August 26, 1996. Academic and personal support services for students, including free after-school child care, have been expanded and efforts are under way to computerize job placement and transfer counseling services to serve our graduates. The college’s community service programs currently serve more than 25,000 residents of the city through academic upgrading, job training and placement, cultural enrichment, and recreation.

Facilities have been renovated to accommodate the increased demand for classroom and laboratory space in the liberal arts in Colston Hall and the sciences and technologies in Meister Hall. The Academic Computing Center and Learning Center have been enhanced with the acquisition of state-of-the-art equipment.

Plans are under way for construction of a new facility to house the campus Child Development Center for the preschool children of students.

The Three Musk of Tears

It was the fourteenth of February
The day was cold
And the winter
Jealous of the coming spring
Bit ferociously with rage.

An army of red lips with banners of
Paper hearts try to defeat the almighty
North wind.

In my way I found a bird
Tired of flying in vain
Looking for a loving touch.
He just gave up.

His helplessness touched me
I picked him up
My hand became his new nest.

When I arrived I met him
In a second, he was rocking me as a child
My head was on his chest
I hear the beating of his heart
With the same longings
Of the wounded bird.

I like to give him
What he has been seeking
During his long journey
Too tired to feel in love
Like the bird
Looking for warmth
In a dry branch
Of a winter tree.

The rug lasted for eternity
I took him to a new dimension, Where anything is possible
Because pain does not exist.
In the distance
A bird sings the melody
Of love and freedom.

The Wounded Bird

A Life in a Day

In the morning, I was weak and followed all the rules.
Life was simpler then, the only love I knew was the
Love of my family, my parents above all. By the afternoon
I started to rebel against everything and everyone. I also
Found a new love, not the love that I had for family and friends,
But a new love, one that was shared between two people.
This new love has calmed me down and given me peace to end
My rebellious ways. Now the evening has come. As I prepare
To lay my head down to sleep, I sit and think of all that I have:
The love of family and friends, and of a partner with whom I
Share
My life. Best of all, I have the love of my children. Now, it is
dark
I close my eyes for the last time. My life went by so fast that
It felt like just one day.

The African Garden

It was there in front of my eyes
With its greenery as in a fairy tale,
Where the trees sing
And recite poems of triumph to the sun.

The flowers that I saw
I never thought they existed
Rainbow of colors, water Lilies, Tulips
Iris, Magnolias
Dancing in a marvelous choreography of petals.

The rose bushes were arranged to the senses
And with their beauty our soul entered dimensions
Of harmony and perfection.

The tall trees stood in symmetrical order
Exactly in the proper place
Like Angels come from above
To organize the landscape.

Old and young united in a magical
Diversity of pigmentation, in a festival of the Black Race
Under your refreshing shade, the wicked become kind,
Tender at your touch.

The essence of your life minimizes bad instincts
And thought becomes as pure as the innocence of a child.
Your Forest is a treasure of the past.
The will to survive is still an echo of your drams
And suddenly we all desire to become
For a second, children without fears and worries.
You bring so much happiness that we want to stay
In your premises forever, where thousands of different plants
Welcome us.

African Garden
If love decides to take a material form,
It will be exactly like you.

What Is Love?

Is love a deep emotion or an unanswerable mystery?
Can it be tested in a lab or defined quantitatively?
Is it something that you feel and touch or something
That you see?
Does it come to each and every man or choose
Selectively?

Does it blossom like a tender rose in magnificent
Array.
Just to wither in the evening at the closing of day?
Is it nature everlasting or of corruptible decay?
For there be many who find love just to find it
Does not decay.

Is it in a look, or in a touch, or perhaps it's in
A kiss?
Does it bring you joy, or bring you pain?
Does it
Fill your life with bliss?
Is it always true, is it always right, or does it sometimes
Go amiss?
And leave you feeling empty and consumed by bitterness?
I do not know. I cannot tell, but this much I can say
Love is what you make it, so make the best of it today.

Jeffrey Handy

Thinking of You!

Our image keeps on flashing in my mind
I cannot close my eyes, neither can I sleep
As the eyes twinkle, I see your image as
The lightning flashes during the rainstorm

Circumstances beyond human control tried to
Lock my affection for you. Stressed and strained
Beyond my capacity, examination tension and
Sleepless nights tried to steal the inner joy I have
About you.

Darkness wanted to hide the fresh air of my love for you
In the dark gloomy dungeon was the place my love was
Hidden. No amount of air could be blown but at last, the
Marvelous light was in the dungeon. Behold, the love
Was released and I could breathe in and think about you.

Michael Mendah

Thinking of You!
The Price of Beauty

Everyone gasped and was awed as she walked into the room. Her looks were stunning. She was perfect, or was she? No one knew her name, and no one dared ask such a stunning woman for her name. Many of the women in the room were so intimidated by her presence that they made mad dashes for the powder rooms to try to compete with the nameless beauty. As she stood there, she waited patiently for someone to ask her to dance or even engage her in conversation. Sadly, no one did. Throughout the entire evening, she stood waiting for a dance partner. As the hours passed, she kept wondering why she was standing alone instead of dancing the right away. She started to think of something that might be wrong with her. She looked at her floor length dress; it was stunning. Her hair and makeup were simple yet elegant. Through college she had maintained a 3.8 average and later had obtained a master's degree in sociology. From what she could see, there was nothing wrong with her. Leaving the party early, she went home extremely depressed and confused. Later that night, after experiencing hours of self-deprecating abuse, she ended her life by over-dosing on sleeping pills. The truth is there was nothing truly wrong with her. The fact was that her beauty was so flawless that it intimidated men and women alike. Men would look at her and think that she would automatically reject them, so they would not try to approach her. Women were so envious of her that instead of inviting her to a light brunch, they would talk badly about her.

Her body was found two days later. She was still in her gown; her makeup had faded a bit, but she was still stunning. As the ambulance workers and the police took her body away, all the onlookers could say was, "What a beautiful woman! What reason would she have had to do this to herself?"

Melissa Mundy

Happiness Recipe

Oh! I must be truly happy for as far as I can see
I have all the ingredients to the Happiness Recipe:
A house, or yet a mansion, I’m the envy of my friends
A Lexus and a Burner, a Rolls Royce and a Bent.
I’ve a wife whose rare beauty rivals the setting sun
A cottage in the Alps for a little winter fun
A son and my two daughters. Oh, what joy they bring to me
And I must admit, I’m set for life, speaking financially.

I must be truly happy: I’m a man of few desires
Whatever: I set my heart on is instantly acquired
Yes. I must be truly happy, I’ve no reason not to be
If happiness is what you see, that really must be me.

I must be very happy: what everyone wants, I’ve already had
And for these many Blessings, I should be very glad
Though I have to say that happiness is not all it’s cracked up to be
For if I didn’t know it was happiness, I’d think it was misery.

Jeffery Andy

Lullaby for Tomorrow

In the middle of your confusion
You did not see the light
And the right to raise your son
Has been denied.

Your nights of insomnia until dawn
With no illusion or hope
And the days become nights.

The new morning has arrived
With a bright sun
And in your mind reigns
The night of incomprehension.

Your affliction is not madness
You are only asking for a drop of love.
Your true Mother Nature is warning
To comfort and love you.

The mist of the morning
Will bring back our son
No more looking at an empty crib.
A lullaby of joy, you will sing to him.

Michael Measah

I'm proud to introduce to the seniors of 2001, the group of people that helped put the Pegasus 2001 together. It was hard for us, but we did it. We did have the patience and we did accomplish our goals. The yearbook staff truly deserves the acknowledgement and respect of the College for a job well done. First I would like to thank Professor Frank Sharpe, Yearbook's advisor, who gave up his personal time after school to plan, organize, and assist in sorting thousands of pictures, cropping, stamping, and proofreading. He also put in his 100% effort, because this is his last book, according to what he says.

Another person that I would like to thank, is Carlos Sierra, who also put in his personal time, and Tom Swift, who was our representative from Herr's Jones Publishing Company, who stimulated my ideas and trained me in all the technical operations necessary in producing a beautiful yearbook. Also, I would like to thank President Carolyn G. Williams, Brenda A. Scranton and Mr. Kirk Daley for believing in my staff and me.

Special thanks to the Art Department, Dr. Ruth Bass and those students who helped us put this yearbook together.

Finally, I extend my thanks to Mr. Edward Thornton of Thornton's Studio, who also helped us with photographic needs. These people were the ones who developed our film and work; they also are the people who take our senior pictures.

Once again, thank you, Mr. Sharpe, for being there when I needed you.

Congratulations to the class of 2001!

Ariel Garcia
