CONSIDERATE

CONCERNED

CHEERFUL

CLEMENT M. THOMPSON
There is a warm feeling of mutual confidence students have when they know of someone in the Administration who truly cares about each individual during his two year (and sometimes longer) stay at Bronx Community College. There is even a greater feeling of respect and admiration for one who, no matter how busy, never fails to give each student’s recommendation the personal touch, to enhance their chances of admission to other institutions of higher learning. If one were to look at him superficially he would appear to be an average, everyday person, but to know him truly is a rewarding privilege.

During a student’s stay at Bronx Community he may come to this office with problems or plans for the future, for which this very special friend will always try to provide a realistic solution or other helpful suggestions. There is always a great sense of welcome from this person instead of a feeling of intrusion upon the routine of a high official in the administration, for this man is actively concerned with students and their affairs. Changes in the administration that benefit the student body are always his concern, for his motto is, aptly and always, “The student comes first”.

We use the words “Change, Concern and Consideration” to describe our friend; to whom we dedicate this Yearbook, the Dean of Students, Clement M. Thompson.
Working for Dr. Thompson, Dean of Students is stimulating and gratifying. His ability to perceive the needs of the students, offer them appropriate help, and his genuine interest in their welfare make this a rewarding job.

Martha Mekul
Secretary

Working in this department is a challenge and ever-changing, and stimulating job.

Rita Gleason
Secretary
To the Class of 1969:

I salute each of you on having reached this milestone in your career. Your achievement is a tribute to your intellectual competence and high seriousness of purpose.

You have heard many times, I am sure, how fortunate you are to be living in a time of unparalleled change and, consequently, unlimited opportunity for personal fulfillment. It is my fervent hope that you will discover early in your career that man achieves full happiness only by helping others.

Some of you will go on to further formal education; others will immediately enter the world of work and contribute their hard-won knowledge to the professions, and to government, business, and industry. But unless you are prepared to risk early obsolescence, all of you will have to continue to learn for the rest of your lives.

Your education at Bronx Community College has made it possible for you to face the challenge of lifelong learning. While it is manifestly impossible to keep up with the spectacular growth of new knowledge, I am confident that the foundation you have acquired is sound and solid; it is now up to you to build on it.

Since there will be so much to learn in the years ahead, you must of necessity be somewhat selective. But I hope you will heed Samuel Butler's admonition: "Woe to the specialist who is not a pretty fair generalist, and to the generalist who is not a bit of a specialist."

We wish you success and much happiness in all your future endeavors. Our warm wishes, our hopes, and our prayers go with you.

Sincerely yours,

James A. Colston

MALE NURSES MOVE IN

It was an advantage for me to have been among the first group of male nursing students to reside in the Staff House, which was made available for our use two years ago. I have found the environment of "living in", has provided me as well as the other male nursing students, with a holistic approach to our nursing studies.

The Staff House, which is also the doctors' living quarters, is located across from the Nursing Center. It makes it very convenient to get to class on time and to utilize the studying facilities of the Nursing Center. We are in the center of the medical-professional complex of the Bronx Municipal Hospital Center and the Albert Einstein Medical College. We are priviledged to use their library and reference facilities.

Aside from our educational growth and development, the complex makes it quite convenient for studying and interacting socially with female classmates in many of the school's social activities.

I am confident that my fellow nursing students share my feelings and I hope that future male nursing students living in the residence will find "living in" as educational and as pleasurable as I have.

Robert L. Bell, Class of '69
Male Representative, N.C.S.G.A.
LIFE IN THE RESIDENCE

Life in a nurses' residence could never be summed up in a few words. The words to describe the kinds of adventures is innumerable. The happy as well as the sad times will never be forgotten. Life long friendships have bloomed as a result of the many ups and downs encountered by the nursing students. We all entered B.C.C. with ideas of uncertainty about living with complete strangers. However, as we look back we do not think of our fellow students as ever being strange.

A friend is someone who will listen as you blow off steam about chemistry, nursing and all other major crisis that occur in our daily lives. One who listens faithfully for that all important 'phone call while you are in the shower. Who will ever forget the familiar sound of doors slamming and radios blasting at 2 o'clock in the morning. The gossip sessions in the lounge about your social life and all the latest happenings. However, last but not least the warm memories of the disorderly floor meetings which always seemed to bring out a few complaints.

All these are part, and only a small part, of our life at the dorm. As we the senior nursing students prepare to leave our "home" and embark upon our nursing careers; we take with us many cherished memories and adventures never to be forgotten.

Patricia Verdell

BCC CHANGES
"First she says she will; then, she says she won't. First she says she can; then, she says she can't." That's me alright (your ever-lovin' editor). Coming and going along with my staff. But the impossible become possible. And, therefore, I offer you your yearbook, with the help of two staffs, the Original, who helped me to lose my sanity, and the Rescue Squad who helped me to gain it back.

I don't know who belongs to which, but my greatest aspirin provider was Jeffrey Dubjack. Thanks to him, I almost took an overdose. But Bob Morales and Gwen Mikeal helped me to maintain my equilibrium. Thanks to my tranquilizers Harvey Schwartz, William Ballinger, and Joel Kweskin, whose faith in me kept me in a state of depression. I was afraid I would surely let them down. But to make sure this wouldn't happen, I had my two pep pills, Linda Davidson and Kenny Stromberg. Their psychedelic art really turned me on. Robert Bell and Gordon Chin still have me in a state of confusion.

Help! Is there a doctor in the house? Lucky me—I have three of the best, Professor Harder, Mr. Merrigan, and Mr Woolfson to whom I turned in desperation from my Rescue Squad.

Your Perplexed editor,

Robin Ann Heller
