In the last few weeks a number of news events have taken place that may not have been very noticeable, but which can seriously affect higher education in a very detrimental way.

The first event was the publication of the results of the most comprehensive study conducted by New America, a non-partisan think-tank based in Washington, D.C. The actual number of severely mentally ill people—those already housed in nursing homes and those mentally ill turning to nursing homes—is staggering. The study documented thousands of cases in which loan companies were given bad information about public approval of loan programs.

The third event was the publication of the results of a survey conducted by New America, a non-partisan think-tank based in Washington, D.C. The survey conducted by New America, a non-partisan think-tank based in Washington, D.C. The survey documented thousands of cases in which loan companies were given bad information about public approval of loan programs.

The fourth event was the publication of the results of a study conducted by New America, a non-partisan think-tank based in Washington, D.C. The study documented thousands of cases in which loan companies were given bad information about public approval of loan programs.

Mentally ill turning to nursing homes

By JOE ROBERTSON
Kansas City Star

Marquis Gamargo — at age 24 — is now locked onto the gravel of their Hickman Mills driveway.

“Can’t believe he’s lost most of his friends,” Gamargo said. “I think he’s less than ideal,” he said. “Why would you want to go that way?”

The nursing homes “are way less than ideal,” he said. “I think it’s a lot more than ideal.”
