Please use this space to share any additional information about how you use technology to support your academic work in hybrid/online classes, especially for locations *other than* at home, on campus, or the commute.

Which technology contributes most to making it all work for you in your hybrid/online classes?

What is most frustrating in terms of technology and academic work for your hybrid/online classes?

If you could wave a magic technology wand, what would happen or appear to make your hybrid/online class experience better?

And finally, we have a few questions about you:

- What's your program of study/major?
- How many semesters have you been in college?
- Are you going to school full time or part time?
- How old are you?
- What is your gender identity?
- What is/are your ethnicit(ies)?
