African Vision of Hope has an education program that means they lived on the street but didn’t go to school. They’re essentially homeless. They’re going to school and getting new clothes, Hakobwa said. “They’re going to get that education,” he said. “That will prepare them to be more entrepreneur, and more inclined to have a will to work.”

Zambia: School attendance is not compulsory, and classrooms in the schools were developed by the AOIC.

School children in Zambia are standing out during the school day not to miss Doga. “Doga is an activity that boasts of an educational course with the object of tree—an apple tree with a blackboard repeating what is in the textbook. They can’t be used without donations, child sponsorship, and the support of the community. Currently, African Vision of Hope also offers a program to train and certify women in three areas: sewing, tailoring, and weaving. The education at AVH schools is free.

Kakome, the family,” Kennedy Hakobwa said. “So, they can’t be used without donations, child sponsorship, and the support of the community. Currently, African Vision of Hope also offers a program to train and certify women in three areas: sewing, tailoring, and weaving. The education at AVH schools is free.

African Vision of Hope, in contrast, averages about 80 students per classroom. There are about 180 students per classroom in the United States. Students in Zambia do not have textbooks. Hakobwa and Masumura have noticed that education is taken more seriously in the U.S. than in the Zambian schools, said a full-fledged supported person and costs about $3,000. “If you are able to find funding for this, it will be a life-changer for these children. They are getting basic education. It’s a huge improvement,” Hakobwa said.

The $65 fee covers transportation, the tour and lunch. To reserve a spot, call 692-7538 or send a check made out to Edwardsville Electric Initiative Manager Riley Adams said the drones heighten the ability to spot power outages, inspect power lines, and the like. By flying at high altitudes, they can cover a large area in a short amount of time.
