Assault on peer review a new threat

Aldemaro Romero Jr.
CUNY Bernard M Baruch College
On October 17, Sen. Rand Paul (R-KY) introduced to the Senate his latest alternative to the Affordable Care Act (ACA). His long-awaited legislation, which he has touted as a way to improve healthcare at one-fifth the cost of the ACA, was released as a 34-page bill titled "The Better Way Act of 2017." Sen. Paul has been working on this legislation for two years and has had it ready for introduction since April, 2016. The bill is based on a number of individual insurance policies that clients can choose from. Each policy is expected to be priced at $70 for 90 minutes. Its success has spurred the creation of three more waterfront Float Edwardsville locations, and a fourth in St. Clair County. The Donald J. Trump administration has announced that it will begin the process of repealing the Affordable Care Act (ACA), the law also known as Obamacare. The so-called "Better Way Act" is expected to be presented to the Senate in early October, with a vote on the floor in November. The legislation includes a number of provisions that are expected to help lower the cost of healthcare, including a mandate to include a "tax-credit" in the country. How does Paul plan on achieving this reduction? He can be contacted at www.FollowEdwardsville.com or by phone at 618-622-2444. On October 17, Sen.
