Assignment 2: Due Monday, September 17 by 6:30pm

Part I: DataCamp's Cleaning Data in Python

- By now, everyone in the class should have received an invitation to join the course group at DataCamp at the email you indicated to me as your preferred email in Assignment 1. Please accept that invitation and complete all assignments in DataCamp through the account associated that email. Assignments completed under other accounts will not be accepted. If you have not received an invite to the course organization at DataCamp, please **email me** as soon as possible.
- For this part of the assignment, there is nothing to submit formally, as I will have reports on your progress from DataCamp.
- Note, the exercises in the course should be straightforward, but note that the course does take 4 hours. Please plan your time accordingly.

Part II: Querying Data through an API.

- The **assignment notebook** has a series of exercises to walk through accessing Film Permit Data from NYC Open Data. Please complete the exercises as instructed in each individual notebook cells to obtain full credit for the assignment. To submit your assignment, please submit a completed jupyter notebook (***.ipynb files only**) through Blackboard.
