Employers seeking skills, not robots

As a new mantra might seem innocuous, the reason for this is not just a personal decision. The crux of the article is that employers are looking for skills, not robots, because they are the ones that will pave the way not only to satisfying the need for human skills mentioned above, but also to prepare the workforce for the future. The article ends by saying that there is no better way to achieve that by emphasizing in college the skills needed by employers. Not surprisingly, the politicians who oversee them, are being geared more towards figuring out if the applicant has the right skills first. The article ends by saying that there is no such a thing as a career path. First of all, in the world we live in today, the specific requirements for different jobs continue to change at a dizzying pace. What we think is most important today will most likely not be tomorrow. Leading to these changes are factors including technological advances and question conventional wisdom. Employers seeking skills, not robots.

Do their part

The Troy/Edwardsville Shrine Club would like to thank Troy Dunkin Donuts for donating two teddy bears to the club. Doing their part to bring cheer to the community.

The Treasury rules state tax deduction

SPRINGFIELD — The IRS issued a reminder in December, which suggested that homeowners who prepaid their property taxes last year will receive a tax credit, the full state and local tax deduction. The IRS doesn’t allow homeowners to prepay their taxes in advance of the current year.

The contest encouraged students to choose an elected position at Edwardsville Township and submit their campaign. The winner was Paris Appleby, a fifth grader at Glen Carbon Elementary.
