Assignment 3: Due Monday, September 24 by 6:30pm

Part I: DataCamp's Statistical Thinking in Python (Part 1)

- The course should appear as assignment within your existing DataCamp account.
- Course takes ~3 hours, plan your time accordingly.

Part II: Project Prep

- Identify **three** datasets you're interested in using for your project, **including at least two that we have not discussed in class.**
- For each of the three datasets, identify a question you'd like to use the data to answer.
- For **one** of the data sets we have not discussed in class, provide one interesting summary statistic and one chart, and explain why you find this interesting. If you already have a team in mind, feel free to collaborate, but each team member must provide their own unique answer (chart and stat) to this question.
- (Optional) List up to three of your classmates you'd like to work with.
- Submit a word or pdf file to Blackboard with your response.
