Uncertain futures for private colleges

Aldemaro Romero Jr.
Although we have a lot of questions about public health, are we 100% safe? Is it truly 100% safe?  

In this case, we are trying to understand if the statements are true or false. 

**True:** The disease has been absorbed by larger ones. 
**False:** The number of high school graduates is declining in the U.S. 

Regarding the sentence about the state, it is ambiguous whether it is true or false. 

**True:** I use earthenware clay to create a one-of-a-kind piece. 
**False:** A small institution should not be afraid to take all the risks. 

In conclusion, the text contains various educational and personal statements, but it is unclear how they relate to each other. The focus seems to be on personal experiences and opinions rather than factual information.
