Dr. Aldenmo Romanero College talk

For thousands of years metalsmiths were held in great esteem by numerous societies because they supported the most important functions of society. In the Roman Empire, metalsmithing was a highly respected profession. However, by the 20th century, this was less true. ‘Metalheads’ is a new term for people who are passionate about metalsmithing.

One of the questions we will ask is what is the future of metalsmithing? What will metalsmiths be doing in the future? How will metalsmithing be different from what it is now? The answer to these questions is that metalsmithing will continue to evolve and change. As new technologies are developed, metalsmiths will find new ways to use materials and techniques to create unique and exciting pieces of art. The future of metalsmithing is bright and exciting. It is a challenging and rewarding career for those who are passionate about working with metals. Metalsmithing is a great way to express your creativity and make a living.

Gottipetti: Diapers from the pantry

With the recent increase in food prices, many families are struggling to make ends meet. The Southern Illinois Food Pantry is one organization that is working to help those in need.

The pantry is located in Murphysboro and serves the community by providing food to those in need. In addition to food, they also provide clothing, household items, and other necessities.

The Southern Illinois Food Pantry relies on donations from the community to operate. They accept both in-kind and monetary donations. They also have a volunteer program where individuals can help sort and distribute food.

The pantry is open Monday through Friday from 9:30 am to 1:30 pm. They are located at 500 E Main St, Murphysboro, IL 62966. For more information, please visit their website at www.siufoodpantry.org.

Stink bug

The brown marmorated stink bug is a serious pest that is found in many areas of the United States. It is a large, brown, flat, insect that can cause significant damage to crops.
