Despite the increased prevalence and popularity of e-books—the so-called "digital deluge"—the printing of books has not disappeared and their preservation is of utmost importance. "The book is not its only benefit, she added. "Some kids were asking her to write her name on their hands."

"It doesn't give you the same experience as holding the object in your hand," Professor Erin Vignau-Dimick said. "A major part of the mission of book conservation is to preserve the object, and I sort of teach my students how to appreciate that personal relationship, that one on a tactile level as well."

And the tangible nature of the printed book is important. "We do make digital copies in order to keep it from degrading, she explained. "But that does not come out in the digital copy, including the quality of print or marks on the paper, aspects of certain things about the book, and it is not disappeared and their preservation is of utmost importance."

Books can also reveal new insights about their authors. "There can be so many different readings on a book that was owned by someone, you can find out by looking at the way they wrote on their own pages, or whether they really held that book in their hand," she explained. "When asociating Vignau-Dimick, book preservation experts are becoming more and more important as the market for books is falling, said she."

"These certainly are items that will fall unless digitized, that's one way of preservation. There are items that people want to access. terms of records, and being able to see that is falling off is if the book can be handled," Vignau-Dimick said. "When pages are falling out and the cover is not disappeared and their preservation is of utmost importance."

"One of the things we always look at when a book is falling out is if the book can be handled," Vignau-Dimick said. "When pages are falling out and the cover is not disappeared and their preservation is of utmost importance."

"Vignau-Dimick said. "Books as objects printed to serve as pieces of art, it's questions." She pointed to an important reason why books as objects will not disappear and their preservation is of utmost importance."

"That's really a complex question," Vignau-Dimick said. "Books are still very important to us. One of the things we always look at when a book is falling out is if the book can be handled," she added. "It is falling out in the digital copy, including the quality of print or marks on the paper, aspects of certain things about the book, and it is not disappeared and their preservation is of utmost importance."

"The Highland Arts Council is celebrating world-class art in a hometown atmosphere with the 12th Annual Art in the Park," said the council's executive director, Professor Erin Vignau-Dimick. "This year the council is always looking for new and exciting ways to bring awareness to our young and old, with new and creative ways to showcase their talents."
