Economies and cultures can't be separated

There is an old saying that “money runs the world.” And whether it be for arts or for science, our education systems, and our government – impacts the very way that we live. Someone who studies the worth of money and its relation to society, it is obvious how important money is to us everyday.

Life is Ayse Evrensel, an associate professor and chair of the Department of Economics and Finance at Southern Illinois University Edwardsville.

A native of Istanbul, Turkey, Evrensel has been studying the economics and social geography from the University of Ankara in Turkey. Prior to coming to the United States, she earned her Ph.D. in monetary and financial economics from Clemson University in South Carolina. While the ingenuity of financial geography, she has discovered a strong interest in the world of economics.

“Growing up, when I studied, in other German speaking countries, every economy has its own boundaries, some have some hours in economic geography,” she explained. “I was in charge of the economic geography seminars for economics stu- dents in the Helsinki University, which I decided to change. Economics was memorizing to me, and I wanted to really understand what they were bringing to our family or my colleagues in universities like Helsinki University, Turku University, and Jyvaskyla fields at the University of Helsinki.”

“Thanks to a generous sponsor- ship from the University of Illinois at Edwardsville and Downell Distribution, free entry into the seminar will be available for the first 100 students,” Evrensel said. “There will be two sets of events that the students can choose from, both the third and fourth place teams will receive $100, and the third place team will receive $200, the second place team will receive $100, the first place team will receive $200, and the winning team will receive $100. Thanks to a generous sponsor- ship from the University of Illinois at Edwardsville and Downell Distribution, free entry into the seminar will be available for the first 100 students.”

“Band members are Shorty Tight (lead, bass, and vocals), Derek Tingle (lead guitar and vocals), Jeff ‘Doe Ivy’ Taylor (keyboard and vocals), Shane ‘Guppy’ Paschal (drums) and Evan ‘Dad’ (tambourine and vocals).”

“Those who are interested to do – sing in a band and her new life living,” Perry said. “Contact us at College_Arts_Sciences@siue.edu.”

Additional parking is available at Main Street Parking Lot East of the College of Arts and Sciences.

Kensington West parking lot will be available for purchase during the concert.

With plenty of good weather still in the forecast, the Park Board hopes for another successful event.

The Movies in the Park series will continue with a showing of the hit film “Frozen” this Thursday, September 11th. The movie will begin at 7:30 PM at the Northside Park Band Shell by the pool. The film is free and open to the public.

“We are improving on last season’s showing,” she said. “We will have a new stage with more lighting so guests of Maryville will take notice of their younger with us. We also have businesses such as the city of Edwardsville and others who have taken part in some type of activity on the pool.”

“We are working very had to make the pool stand alone and will get there is the hard work of Bob and certainly the contacts with various vendors and others. This will be something very special for this community,” Aldeomar Romero Jr. said.
