Economics and cultures can't be separated

There is an old saying that “money rules the world.” And whether we like it or not, finances—our own and that of our government—impacts the very way that we live. Someone who studies the world of finance and its relation to our everyday lives is Ayse Evrensel, an associate professor and chair of the department of economics and finance at Southern Illinois University Edwardsville.

A native of Istanbul, Turkey, Evrensel earned her bachelor’s degree in economics and social geography from the University of Istanbul in Turkey. After earning her master’s degree from the University of Zurich in Switzerland, Evrensel earned her doctorate in economics from Clemson University in South Carolina. While the geographic scope of her work is global, she has discovered a strong specialization in the field of economics.

“I studied, when I studied, and I studied in other German-speaking countries, every economy is different. In some cases there are some hours in economic geography,” she explained. “So I was in charge of the economic geography seminars for economics stu- dents in the Alpensia region. I decided to do something else. Change. Economics was memorizing to me. So I thought I’d like to try something new. Neither my family nor my colleagues in Munich or my friend’s husband in Switzerland understood.” She decided to come to this country to study mal- eability in finance and its relation to the world of economics.

Thanks to a generous spon- sorship from the Edwardsville & Donnewald Distributing Company, prize money will be awarded to the top rank- ing teams. The first place team will receive $200; the second place team will receive $100; and the third and fourth place teams will receive $50.

The tournament will begin at 7:30pm Friday night and will con- tinue until 11pm. The next day games will resume at 12:00pm and will continue until the winning team is selected. The Parks Department has reserved grill hammers and brushes in the concession stand and a beer cart for teams to enjoy. Food and beverages will be served for those wishing to spend their lunch hours and cheering for their favorite teams.

Registration fee per team is $50. The tourna- ment is a 40 player division. Teams will consist of 4 men and 4 women, and the roster cannot change once the registration is closed.

For more information regarding this tournament including rules, participation, and online registration, visit our website at www.city- ed.com or send an email to College_Arts_Sciences@siue.edu.

In this presentation, Club Adviser and SWIC student Coryne Cramsey said. “The freshman program will discuss how astronomical objects interact with each other and with the universe as a whole. The emphasis will be on the scientific method and how to use it to solve problems and make conclusions.”

For the intelligence

"Astronomy in cultures is Wednesday, Nov. 5 at 7:00pm in the SWIC Student Center. Dr. Evrensel is the Dean of the College of Arts and Sciences at Southern Illinois University Edwardsville. She says, "We have every reason to believe that history will rise. That is an important topic. The relation between culture and civilization, pasture and science, and the way in which civilization has influenced the development of pastures and science is a very important topic. The relation between civilization and science is a very important topic."
