**Regional U.S. lags behind in many areas of higher ed**

Data can help make clear some of the important — and interesting — differences in education across the U.S.

The U.S. lags behind other developed countries in many areas of higher education.

For instance, in terms of graduation rates, high school graduation rates in the U.S. are lower than in most other developed countries.

2016 Graduation rates for three categories of degree recipients were calculated. The results showed that the U.S. had the lowest graduation rates for all three categories.
