THIRTEENTH ANNUAL REPORT

OF THE

FACULTY OF THE FREE ACADEMY,

TO THE

BOARD OF EDUCATION.

FREE ACADEMY, NEW YORK,
July 14th, 1864.

The Committee appointed to prepare the Annual Report to
the Board of Education, respectfully submit the following for
the consideration of the Faculty, and unanimously recommend
its adoption.

H. J. A. Körner,
J. A. Nichols,
J. T. Benedict,
A. J. Morales,
R. Ogden Doremus,

Committee
of the
Faculty.

On motion, the Report was adopted, and the President and
Secretary of the Faculty were directed to sign and transmit
the same to the Board of Education.

GERARDUS B. DOCHARTY,
Secretary.
In their Annual Report the Faculty would congratulate the Board of Education and the Executive Committee upon the favorable auspices under which the Academy has commenced another year. We have now entered upon the sixteenth year of the Free Academy, a time scarcely sufficient to expect that harmony of parts which is looked for in other institutions, yet a very decided progress has been made towards the establishment of a popular and liberal institution of learning. The discipline in the Academy is, perhaps, better than at any former time, and the scholarship is becoming more thorough as the departments become adjusted to work in harmony with each other. The friends and patrons of the institution are beginning to realize some of their anticipations in regard to it. It has grown up under their observation to be one of the established Seminaries of the land, with its new class regularly coming in, its old classes in systematic working condition, and a large class of graduates annually leaving to act their part in the drama of life. They are, in fact, now acting a part, for we hear of our Alumni already as successful business men, as competing successfully with others in the various professions—as taking a part in City and State legislation, and as holding prominent positions in the Army. In view of such facts, the Board of Education and the Executive Committee must have great cause for the expectation of future success.

During the past year the Principal has made improvements in the system of discipline, by which less of his time is taken for this department. With the assistance of statistics furnish-
ed by Standing Committees of the Faculty, the Principal has been able to furnish parents promptly with all the facts relating to the deportment and standing of their sons, and he has found no difficulty in securing a cordial acquiescence on the part of parents and students in the disciplinary decisions necessary to maintain good order.

In scholarship, the Board of Education intends that the Academy shall stand high, and it gives the Faculty great pleasure that they can report a constant improvement in this respect. A logically arranged course of study, good discipline, and constant effort on the part of those engaged in instruction, are the indispensable means by which this desirable object can be attained.

Since the date of the last report, Prof. Gibbs has resigned, and Prof. Doremus has been appointed to fill the Chair of Chemistry and Physics. The Professorship of Natural History, formerly held by Prof. Doremus, is now in charge of Prof. Draper, appointed to that Professorship.

The Executive Committee have made extensive additions to the apparatus; have provided a room with conveniences to illustrate certain branches of Natural History; have constructed cases for physical apparatus, which though not fully answering their wishes, are the best possible under the circumstances; and they also contemplate extending the course in accordance with the expressed wishes of the Faculty. *

In consequence of the rapid increase in the number of students, the Faculty have long been convinced of the necessity of an additional building with a sufficiency of rooms to meet fully the wants of each Department, such as drawing-rooms, Museum of Natural History, Chemical Laboratories, and to which should be attached an Astronomical Observatory with its appurtenances; suitably protected rooms for apparatus illustrative of Physics. The Institution, in fact, has outgrown the original provisions of the Board, and the inconveniences incident to this rapid growth must be put up with till more ample accommodations are furnished. The improvements made by

---

*This, we are happy to say, has been accomplished since the date of this report.
the Executive Committee partially meet the present demands of the Departments of Chemistry and Natural History, but these changes are of a temporary character and do not reach the wants of other Departments. The drawing-rooms are far from furnishing accommodations for the students in attendance, and many of the recitation-rooms are only about one-half the required size. The Professor of Chemistry and Physics is still obliged to give instruction in these subjects in the same room, and often on the same day; whereas, in the other Colleges of our City, especial care is taken to avoid any communication of the fumes of the Laboratory with the Physical Apparatus.

The Faculty have experienced this want of room the more keenly, year by year, for since the establishment of the Free Academy, almost all the prominent Colleges of our City and State not only, but throughout our land, have made extensive additions to their Courses in the Technological Departments to meet the demands of Modern Science—and it is our earnest desire not only to equal, but to excel them in this respect, in order that (to quote from the original report recommending the establishment of a Free College or Academy,) "those who have received their primary education in the Public Schools can be admitted to all the benefits and advantages furnished by the best endowed College in the State, without any expense whatever." And also, "that we may furnish peculiar facilities for the instruction of the highest order in various branches of knowledge omitted altogether in other Colleges, or not practically taught."

In connection with want of room for the ordinary purposes of recitations, lectures, &c., the Faculty would refer to the necessity there is for fire-proof buildings for the Library and Apparatus. The Library, which contains eleven thousand volumes, cannot cost, at the present value of books, less than $25,000. Many of these books are rare, and could not easily be replaced, were they to be destroyed. If we consider the Library, the Text-books and Books of Reference, the Philosophical, Chemical and Mathematical Instruments, the Cabinet of Natural History, containing about three thousand specimens, and the Casts, Models, &c., in the Department of Fine Arts, we shall have in the aggregate what could not be procured for
$50,000. It is desirable, therefore, that the Board of Education erect buildings for the security of this property at the earliest time possible.

At the last Commencement, the Graduating Class consisted of forty members. This is a larger number than have graduated in previous years, except in the years 1860 and 1861, when there were forty-six and forty-nine respectively. The Free Academy has now sent forth three hundred and seventy-two Alumni since 1853, when the first class graduated.

At the last annual examination for admission four hundred and thirty-two (432) candidates presented themselves, of whom three hundred and fifty-two were accepted to enter the Introductory Class. As in previous years, there was a large number of deficiencies in Arithmetic, Algebra and English Grammar. The Faculty would again call the attention of the Principals of the Schools to this fact, and ask their co-operation in our endeavor to elevate the standard of scholarship in English Grammar and Arithmetic. It is the more necessary in these two subjects, from the fact, that they are not required studies in the Free Academy course. In table (A) below is the number of candidates for admission in each year from 1854 to 1863 inclusive; the number of failures in each subject; and the average grade of all the candidates in each subject for 1864.

Of the three hundred and fifty-two (352) admitted to the In-
troductory Class, one hundred and seventy (170) chose the Ancient Course, and one hundred and eighty-two (182) the Modern Course. Previous to 1852 about three-fourths of the pupils chose the Ancient Languages, and one-fourth the Modern. From 1852 to 1859 the representation gradually approached to an equality in the two departments, and from 1859 to the present time this equality has been practically preserved.

One of the most prominent features of the Academy is the attention given to languages. The Board of Education, at an early day, wisely decided to give our students great linguistic advantages, both theoretically and practically, and they have, therefore, represented in the course of study the English, Latin, Greek, French, Spanish and German Languages. Of these it was eminently proper for the English to take the lead, and it was, on this account, included in both the Ancient and Modern Courses. The Ancient Course begins with Latin in the Introductory year, and continues with the Greek in the Freshman year, which accounts for the larger number studying the Latin. A similar reason accounts for the difference in the number of those studying the French, Spanish and German. The French is begun in the Introductory year, the Spanish in the Freshman, and the German in the Junior year. With these limitations in operation, the number who studied the different languages during the year was as follows:

<table>

The Faculty would call the attention of the Board to the average standing of the candidates presenting themselves at the last annual examination, taken by schools. Such a comparison will, of course, reveal differences, which grow out of unfavorable location, occupation of the parents, and other circumstances, over which the local School Officers, Teachers and the Board of Education can have but little control. When we remember, that the average age of these candidates was only fourteen
years and six months, and that they were examined in the nine subjects of Reading, Spelling, Writing, English Grammar, Arithmetic, Algebra, Geography, History and Book-keeping. We must conclude that the high average standard attained by the pupils is very creditable both to themselves and their instructors. The high standard attained by these young lads under the severe test of the examination may be seen from the following table:

<table>

</table>

Showing the number of the school, the ward in which it is
situated, the name of the Principal, number of candidates sent, the number rejected, and the number admitted from each school, and the average standing of all the candidates from each school.

Of the thirty-seven schools represented at our last examination, twenty-nine had a general average of over sixty per cent. of the maximum in all the subjects; fifteen of the Schools had an average of seventy per cent. and over; eight had an average of over seventy-five; three stood over eighty; and one ranked above ninety per cent. The highest Schools sending more than one pupil, are those of Messrs. Belden, Wood and Harrison, Numbers 44, 49 and 41. The grades of these Schools indicate a very high standard of scholarship, the lowest being over seventy-seven per cent. of the maximum. Schools Nos. 2, 39, 34, 48 and 40, of Messrs. Kimball, Warner, Martin, Partridge and Scott, sent us pupils averaging over seventy-two per cent.; and Schools Nos. 4, 3, 14, 42 and 9, of Messrs. Demilt, Patterson, Olney, Boyle and Robinson, all averaged seventy per cent. and over.

The following Schools had ten or more pupils received into the Introductory Class for the current year:

School 35, Thomas Hunter, Principal .......... 107
   40, David B. Scott, "  .......... 55
   45, Lemuel H. Waters, "  .......... 22
   14, La Fayette Olney, "  .......... 20
   42, J. T. Boyle, "  .......... 16
   41, Thomas F. Harrison, "  .......... 15
   44, Wm. Belden, "  .......... 13
   17, James Monteith, "  .......... 12
   48, J. H. Partridge, "  .......... 10

From which it may be seen that of thirty-seven Schools sending three hundred and fifty-two pupils, the above nine Schools sent two hundred and seventy.

Finally, the Faculty would render their acknowledgments to the Board of Education, and especially to the Executive Committee, for their kind attention to our personal wants, and for their patient co-operation with us in a common effort to estab-
lish the Academy upon a permanent basis. From a review of the past, and a survey of the present, all friends of the Institution can have none but the most hopeful anticipations for its future welfare and success.

All which is respectfully submitted.

HORACE WEBSTER,
President of the Faculty.

GERARDUS B. DOCHARTY,
Secretary.
REPORT.

To the Board of Education
of the City and County of New York:

The Faculty of the Free Academy of the City of New York, present this, their Thirteenth Annual Report, to the Board of Education, agreeably to the regulations for the care and government of said Institution.

At the close of the Second Academic Term, July, 1863, the number of Students on the rolls of the Institution was 493
Graduated July, 1863 ........................................... 37

Total ............................................................... 456

New Class, admitted at July examination .......................... 350
Re-admitted ......................................................... 6

Total on Rolls at opening of Term, September, 1863 ... 812

The Students were classified as follows, viz.:

Senior Class ............................................ 49
Junior " .................................................. 59
Sophomore " .............................................. 89
Freshman " ................................................ 171
Introductory " ............................................ 444

Total ............................................................... 812
The number of Students who left the Institution during the First Academic Term, ending Feb. 11, 1864, was 289:

Total on Rolls at Examination, February, 1864......523

SECOND ACADEMIC TERM.

The second Academic Term commenced February 11, 1864, at which time there were on the Rolls of the Institution 523 students, viz.:

On Examination Rolls............................................523
Admitted ..........................................................000

Total.............................................................523

The Students were classified as follows, viz.:
In Senior Class ........................................ 43
In Junior " ........................................ 39
In Sophomore " ..................................... 59
In Freshmen " ...................................... 110
In Introductory " .................................. 272

Total at Commencement of Term .................. 523

The number of Students who left the Institution during the Second Academic Term, ending July 19th, 1864, was 113, viz.:

From Senior Class ..................................... 3
" Junior " ........................................... 5
" Sophomore " ....................................... 9
" Freshman " ....................................... 23
" Introductory " ..................................... 73

Total .................................................. 113

The examination of Students for advancement, Second Academic Term, (from July 5 to July 12,) resulted as follows, viz.:

At the opening of the Term—

Senior Class contained (as before mentioned) ............. 43
Of whom 3 left during the term.
40 graduated.

Junior Class contained (as before mentioned) ............. 39
Of whom 5 left during the term.
30 were advanced.
4 were not advanced.

Sophomore Class contained (as before mentioned) .......... 59
Of whom 9 left during the term.
44 were advanced.
6 were not advanced.

Freshman Class contained (as before mentioned) .......... 110
Of whom 23 left during the term.
68 were advanced.
19 were not advanced.
Introductory Class contained (as before mentioned).............272
Of whom 73 left during the term.
138 were advanced.
61 were not advanced.

The following list contains the names of those Students who
left the Institution during the Second Academic Term, viz.:

**Senior Class.**

Aiton, Robert,
Granberry, Theodore,
Hitchcock, Urban G.—3.

**Junior Class.**

Barhydt, Parish H.,
Noyes, Frederick B.,
Parsons, John H.,
Potter, Charles E.,
Smith, Isaac S.—5.

Total on Rolls at the close of the Term, July, 1864...410
Graduated (Senior Class) July, 1864............... 40

Total ........................................... 370

The examination for advancement commenced July 5, and the examination for Admission commenced July 1, 1864.

There were four hundred and thirty-one (431) applications for admission from the various Grammar Schools of the city. Of the number examined, three hundred and fifty (350) were admitted as having passed a good examination in those studies prescribed by the rules regulating the admission of Students to this Institution, and eighty-one (81) having been found deficient in those studies necessary for admission, were rejected.

Of the number admitted, one hundred and seventy (170) chose the study of the Ancient Languages, and one hundred and eighty-one (181) chose the study of the Modern Languages.

SCHEDULE.

The following Schedule contains the number of candidates presented for examination, those admitted and rejected, and the Schools from which they were presented:
