Brooklyn College
Directory of the Buildings

October, 1937
A Word of Appreciation . . . .

We wish to express our gratitude to those who have made possible these beautiful buildings: to the city officials, to the administrators of the P. W. A., and to the many thousands of workmen who fabricated and constructed these new buildings of Brooklyn College. We are especially grateful to the members of the Board of Higher Education. They have given whole-heartedly of their time and energies to further this great project.

This Is Your School . . . .

It is the realization of a dream. The style of architecture is typically American and the materials incorporated into its structure have come from all parts of the United States. The Federal Government and the City have shared in its cost.

We who constitute the faculty and student body of Brooklyn College should enter these halls with a determination to establish here traditions equal to those that distinguish the most worthy American colleges.

*Room Numbering System in Academic and Science Buildings

The floor plans are similar and the door numbering system identical in the Academic and Science Buildings. The four-digit room number is interpreted as follows: Room 2143,

2 — Floor
1 — Corridor
4 — Position in Corridor

See Page 7 for Corridor Plan.

Brooklyn College Will Grow . . . .

Brooklyn College is not complete. We need an AUDITORIUM BUILDING which will house those departments whose special requirements could not be adequately met under the present plan. We need an auditorium for commencement exercises, for varsity plays, for invited speakers, for Pan-Hellenic activities, for dance recitals, for innumerable extra-curricular activities. There is room for an auditorium near the Gymnasium.

We need a STUDENT BUILDING to provide quarters for the various clubs, organizations, and publications. No provision has been made in any of the present buildings for student halls and lounges. Athletics play an important part in the modern curriculum. It would not be very expensive to build a STADIUM at the extreme western end of the campus. A stadium is a vital necessity.
