To the Members of the Staff -

On February 15 the Board of Higher Education passed the following resolution:

"Farm Labor: Resolved, That the Board of Higher Education endorse the plans now being formulated in the college on the basis of our experience during the summer of 1942 to cooperate with the Governor of New York and the Federal Department of Agriculture, and to give all possible aid in the solving of the needs of agriculture for supplementary labor during the 1943 crop season."

During more than six months, the Committee on Student Employment, with an ever increasing number of the staff as associates, and with the valued aid of Mrs. O'Neil of the Placement Office has been working on plans to make feasible the service of a considerable number of our students on the farm front during 1943. The enclosed letter, which appeared recently in The Sun, and the accompanying editorial from that paper, give a general summary of present developments.

Any member of the Committee will willingly furnish additional information. Copies of the report of the 1942 experiment may be obtained at the Placement Office, 2215 D.

The Committee on Student Employment
