Ultra-Modern Swimming Pool Has Submerged Lights That Indicate the Racing Lanes

The new Brooklyn College home at Avenue H and Bedford Avenue will have 494 rooms in the five new buildings. It will be the first of the five office and loft buildings on its old site at Borough Hall. There are 948 rooms in the five Georgian buildings and a forty-acre campus.

The new Academic Building has 322 rooms, most of them for the School of Education. It will be overlooking onto the balcony on the second floor, and overlooks the campus. It will house the School of Education, consisting of a study, a colored tile bathing room and a bathroom. This building contains the main office building committee for higher education.

The cafeteria in the basement will accommodate 500 students, and is also a small faculty dining room. There are little theatre for the shopping department.

3-Story Science Building

Facing the Academic Building across the street is the first science building with its 312 rooms, three floors, and the moving of the large lecture rooms. The larger lecture rooms will seat 270, and there will be a science room for the faculty.

This building, when completed, with its seven-inch telescope, glass petri dishes, and laboratories, is expected to attract students from any college in the country.

The Reading Room and quadrangle is the library with its high-flurc tower and clock whose chimes sound every hour. There will be 27 rooms, all equipped with reference rooms and a circulating library. There will be a basement place of the college with its fine Old Colonial design both inside and out. The building is being planned on the other side of Bedford Avenue from the Academic Building. In two, there are two very large gymnasia, one equivalent to 62 rooms. There are also additional fencing, boxing, and wrestling rooms for the men's and dance studio for the women. The Gymnasia is a modern building with submerged lights that clearly indicate the use of the regulation A U. pool.

494 Rooms in the campus to erect four or five additional structures to care for future growth.

Brooklyn College was established by the Board of Higher Education in 1917, and was incorporated earlier as branches of Hunter and City College. On Oct. 18 it will be a full-fledged college, a year later than usual because of the construction of the new buildings.

The new college was built with the aid of a $3,500,000 loan from the Federal Public Works Administration. The building was then purchased by the city for $1,475,000, The city having received $10,000,000 during depression years from more than $4,000,000. An additional $460,000 was provided for new equipment. In the last week of the $1,500,000 college was completed and Robert J. Fee, curator at the college, said that all buildings are soon to be used for landscaping and beautifying the grounds.
