Let go of Colonel Oglethorpe, Egbert.

Lots of people have beards besides Communists!

Youth Stands for Progress

This is not a weekly fire-side talk. We're not going to pour you with sentimental generalizations. We are not spelling God in politics, nor can we offer you any contract for Young Storm Troopers. Furthermore, we give no basis for Restoring the Reign of Souls. What the Young Communist League wants to know, and discuss with you, is in the importance of the elections to us, the student youth of America and the importance of youth in the elections.

Are there any specific points upon which we can all agree? The Y. C. L. thinks that there is. American youth does not want Fascism. American youth wants peace. American youth wants a chance to live a happy life, to work, to marry, to raise a family without that dread feeling of uncertainty for the future haunting our waking hours. American youth desires democracy and the pursuit of happiness—it grows in the tradition of the Declaration of Independence and emphasizes its fighting spirit.

Truly, youth deserves all the attention that the parties have given it. We fought for the U.W.A.; we did, it inadequate as it is. We fought for an American Youth Congress: we got it.

We fought against R.O.T.O.; it has been made optional. But we must be on our guard, the price of liberty is vigilance. The issues to be decided by America are the most important since the Civil War. These advances that have been made by youth and the American youth the most terrific odds, are being threatened. America must make a better decision than did Italy and Germany. In our land, a radical government is taking more steps. We are not peacemaking in politics, nor can we offer you any contract for Young Storm Troopers. Furthermore, we give no basis for Restoring the Reign of Souls. What the Young Communist League wants to know, and discuss with you, is in the importance of the elections to us, the student youth of America and the importance of youth in the elections.

These advances that have been made by youth and the American youth the most terrific odds, are being threatened. America must fight for peace, not for the Fascists. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government. What the American youth wants is not a Fascist government.

Since the Young Communist League organized, we have been fighting for the welfare of the youth, generally and on the campuses. We fight for the student body, specifically, and we feel that we too can do something to give a few words of advice to the Freshmen.

First of all, your problem are our problems: we are the sons of hard-working people. We all like knowledge in itself, but we know that we also can get along with making a living with our training. We all want to live a free, happy life: to study, to play ball, to have fun, to find the future with a secure footing. How shall we go about solving our problem?

If our problem are common ones, so are views the Fascist is.

It's the only way to get rid of R.O.T.O. A part of the national student organization that existed was to fight against militarism, the American Student Union. The A.S.U. is the only organization in the campus that fights against war. It is a member in the usual sense of the term. It fights for N.W.A. jobs for us at lower wages; it is a union for free books; it is a better facility; it demands the right of speech; if it fights against racial discrimination.

The House Plan is one of the most important problems on the campus to draw you out to make you a well-rounded person, better able to act with given task. Feel that you are necessary part of the House - booming native or your house don't want to be required. We know that greater problems confront you, but the House Plan will not help. It is no advantage if you make it or organization. This does not mean to say that you should cool your interests to the House Plan.

By fighting for your rights, for your right to live, not the Young Communist League believes you will become the final solution. No one says that, whether people are more important than profits.
Ye scribe heard some of the worst dirty stories yet around the campus at that Merc. tea. Later, Mr. Karpp was heard saying, "If the downtown girls are on the business stuff, they should be treated as one of you"-to the same group. ...Evidently, K.K. didn't hear those rotten stories..."Why did Irv Parker's order concerning that Wellesley pip cool down?? It wasn't because of that well-known Y. C. Ler who plays Lacrosse and sings, was it, Irv??? We're willing to bet Mr. Ardent Arm that the Fresh class murders the Soph class. C'mon Fresh, you showed good sense in electing a full A.S.U. slate. Go one step further, and show the silly Sophs what class consciousness means...

Rarity: That Londonite in the House Plan... So, you really can fool some of the people...

Signal of success:- That Economics Jamboree at the House Plan was attended by Joseph P. McGoldrick and three other biggies on the Board of Higher Ed., not to mention our own Prof. Babor, Dean Turner and Dr. Gottschall. To Dr. McGoldrick-- "We hope that your bill permitting the charter of any student group goes through the Board. We will put up a fight for it as it means immediate legalization of the A.S.U.".

Most of the House members have awakened to the superlatively silly results they brought about in the referendum last term... They voted to take a stand on student and general affairs for the "time being", and not as a general policy... Is that the reason that Mr. Karpp is planning an extensive educational program??

Things about which to be glad; ...The coming carnival to be run by the House Plan. It's gonna be tremendous, boys, and it isn't enough to merely be glad. We all have to pitch in and do something. Let's shake off that lethargy that most of us seem to be in and make this thing the biggest affair ever run in City College... -ELZA

(cont. from page 2)

Youth Stands For Progress said that we were not ready for a Farmer-Labor Party. Going from collaboration with the financiers to a leftism of a sect, they have isolated themselves from the world of reality. Their inactivity and idle theorizing are actually aiding the Fascist warmakers. We say to our Socialist friends- "The road to the Fascist hell is paved with good intentions. Show that you are friends of the masses by joining in the fight to build a broad People's Front against reaction."

The Communist Party and the YCL are utilizing this campaign to build a People's Front. We have put forth men trained in the struggle for a better life, Earl Browder and James Ford. To the students we have this message: 1. Fight for the extension of NYA. 2. Fight for the American Youth Act drawn up by the American Youth Congress to provide jobs and security for us. 3. Fight for academic freedom... If youth stands for progress, it belongs in the Young Communist League!
