The Trade School Mentality

We have always believed that the most important factor in the education of a person is the development of the individual's character. At a community college, we believe in the development of the individual's character, and also of being able to adapt the curriculum to the needs of the community. Our school is not only to be of service to the community, but also to be capable of integrating itself into the community as active, willing and able members.

Minimum Must Be Achieved

As students of City College we want our school to at least do the job of preparing the minimum in the field of business, science, and the arts.

Why?

It is all too easy for us to say that the fault lies with the college itself, with the instructors and their methods, with the system, or with the students. To be sure, it is no easy task to analyze the fault. It is not easy to determine the fault. But we must be responsible, must never resign ourselves to the fact that the fault is elsewhere, must never resign ourselves to the fact that the fault is elsewhere, must never resign ourselves to the fact that the fault is elsewhere.

Always Ready For Learning

We've often seen our colleagues changing, studying, and preparing, but on other matters, too. It is just as true of the college. We shall be ready to study and to work. We shall be ready to do our job. We shall be ready to be active, willing, and able members of the community.

College: Port Vital

The part that the college administration can play is important. The part that the college administration can play is important. The part that the college administration can play is important.
