Jazz Concert Features Dixie and Progressive

By A. L. Goldberg

Pauline Edwards Theatre will be the site of the first Student Council Jazz Concert, Saturday evening, November 19. Tickets, now on sale at $1.25 for orchestra and mezzanine, and $1 for balcony.

Feated at the affair will be Lee Konitz’s Progressives and Bill Davidson’s All Stars. Also featured is Carmen Romano, a vocalist.

Lee Konitz’s Progressives have been seen at Birdland and Basin Street, playing modern jazz, while Wild Bill Davidson’s All Stars are currently featured at Eddie Condon’s and Don’s. They also have been seen at the Central Plaza and at Basin Street. Carmen Romano, featured female vocalist, can currently be heard at the Waldorf-Astoria Hotel.

The two bands will alternate throughout the entire show, which will reach its climax when the two groups play together.

Florence Neuman and Joe Pescuolli, Concert co-chairmen, have expressed the opinion that if this semester’s “Jazz at City College” is a success it will become an annual affair.

Organizations, fraternities, honorary clubs and individual students who have reserved tickets for the Concert must pick them up at the box office where they will be placed on public sale.

Elevator ‘Crash’?

Mechanical Failure Blamed

It was just a routine trip, repeated a thousand times during the school year when elevator No. 5 began its descent from the 8th floor, with a capacity load, last Wednesday. But this was not destined to be a routine trip, for elevator No. 5 was heading for a crash landing while its operator was powerless to prevent it.

Glimping smoothly to the 3rd floor, the ill-fated No. 5 suddenly went out of control as it reached the main landing. The car plummeted to within a few feet of the bottom of the shaft, leaving it about four feet from the level of the first floor. Darkness filled the car, as the electrical system failed, but in spite of this sudden turn of events the occupants remained calm. Rescue operations went into effect immediately, and a short time later all of the victims were removed to safety. No one was seriously injured.

At this writing there has been no further explanation as to the direct cause of the accident. However, technical failure has not been checked. In June the elevators were certified as being safe. The most popular theory is that the operator’s watch failed. The operator was unable to close the gate. In the opinion of most occupants of the car’s riders, the operator should have requested some of the students to leave so that he could close the gate.

The entire story is still shrouded in a cloak of ambiguity, especially as to the direction in which the elevator was originally traveling. Jerry Arrow, one of the students, reported at the scene that his watch flew off as a result of the impact. Dr. Frank Thorson of the Department of Physics, who was also present, reported that this type of thing has never occurred during his tenure.

Immediately after the crash an anxious rescuer peered into the car and inquired whether everyone was all right, whereupon some morbid victim replied, “No, we’re all dead!”

Benewitz to Discuss Right to Work Laws

Dr. Hopkins recently made the Baruch School's maintenance office his new home. He replaced Mr. Holm, who is now a consultant to the college's Pan American Project.

In the Economics Department, Professor Benewitz, a specialist in labor economics, will announce that he will be speaking on "The Right to Work Law." He will discuss the implications of this law on the labor market and its effects on workers and employers.

Dr. Hopkins has been a professor at Baruch for several years and has made significant contributions to the field of economics. His expertise in labor economics and his passion for teaching make him an ideal speaker for this event.

The lecture will take place in the Economics Society meeting room, and is open to all students, faculty, and staff. It promises to be an enlightening discussion on an important issue.

Homosexual Behavior

Topic of Talk by El

By Irma Friedlander

Dr. Albert Ellis, prominent psychologist, will present a talk on "Homosexual Behavior," at a meeting of the Psychology Society, Thursday, at 12:15 in 300.

The talk will be held in 300, the Psychology Society's regular meeting place. The subject of the talk is "Homosexual Behavior," and it promises to be an interesting and informative discussion on the topic.

Dr. Ellis has been a prominent figure in the field of psychology for many years, and his work has contributed significantly to our understanding of human behavior. His expertise in this area makes him a valuable speaker on this topic.

This talk is open to all interested students, faculty, and staff. It promises to be an enlightening discussion on an important issue.
Letters To The Editor

Activity Fair

Dear Editor:

The Activity Fair held in the gym on Saturday night was a success. The students had a ball, and the atmosphere was electric. It was a great way to showcase our school's talents and bring people together.

Sincerely,

[Name]

Imprimatur

When every student from a residence to review publications we're on our guard. No matter what is on each page, we must be sure that what we read is not the work of the students who are represented by them. No matter what is on each page, we must be sure that what we read is not the work of the students who are represented by them. No matter what is on each page, we must be sure that what we read is not the work of the students who are represented by them.

Bob Becker, '57

President of the Council

Student Body

When ever anybody forms a committee to review publications, it is because the papers are forced on us, forever established by a resolution of the Council, which contains so many ideas that it is a reflection of the constituency of the school. It is a reflection of the constituency of the school.

President of the Council

Student Body

Costs

The various chairmen and members of the budget and advancement of business school students have continually stressed the importance of items. It is extremely important that the students understand the importance of these costs.

Jerome Greenberg, '57

Boosie Elected

By Wallace S. Nathan

It was stated in the last issue of Ticker (November 2) that the student newspaper was going to publish a story about the election of Boosie to student body president. However, the story was not published.

Boosie was not elected, but she was a candidate. She campaigned hard and was a strong contender. It is unfortunate that the story was not published, as it would have given the student body an opportunity to learn about her platform and her vision for the future of the university.

Sincerely,

[Name]

Boosie

Young engineer decides what colors are best for G-E reflector lamps

Which color of light makes people look natural? Should a blue light be used more often than a red? What kind of effect does a red light have on merchandise? In recent years, color photography has become so important in stores, restaurants, theaters, and displays that General Electric develops a line of new easy-to-use color reflector lamps for this market. The man responsible for deciding which colors are most effective for uses of these lamps is 39-year-old Charles N. Clark, Application Engineering Color Specialist for General Electric's large lamp department.

Clark's Work is Interesting, Important

In a recent article of Electronics Clark made a critical appraisal of literally hundreds of color filters to find the ones that produced maximum results but were still suitable to high-production techniques, practical testing and simplified selling. His work and this experiment work also had to take into account all the information on human perception of colors.

College Graduates at General Electric

When Clark came to General Electric in 1946, he knew the work he wanted to do. Like many of the 25,000 college graduates, he was given a chance to grow and realize his full potential. For General Electric has long believed this: When a man, young men are given freedom to make programs, everybody grows, the company, the town, and the country.

By Dick Benton

For the Vernon brothers and for the South Dakotans, this will be the year of the bull. The North Dakota say to the Governor of South Dakota? "That's two bits a day, but this is a different situation. Next year's opening date of the serials' will be November 4. That's exactly what he said."

But this year is a different situation. Next year's opening date of the serials' will be November 4. That's exactly what he said.

Hobnan further stated that he had already begun planning the serials' for next year. "We have already begun planning for next year," he said. "That's what I mean."

Hobnan further stated that he had already begun planning the serials' for next year. "We have already begun planning for next year," he said. "That's what I mean."

North Dakota will be handicapped by the loss of its top two tackles, but this year's team is a different situation. Next year's opening date of the serials' will be November 4. That's exactly what he said.

City Opposes Hunter Monday
For Met Soccer Supremacy

The Metropolitan Soccer League's two powerhouses, City and Hunter Colleges, will meet head-on at Lewisohn Stadium Monday at 3:30 in the game that will decide the conference crown.

Only a Hunter victory will bring the Hawks their first league championship, as they trail the standings. Coach Harry Karlin's undefeated eleven has a 5-0-1 mark while the Bronxites stand at 4-0-2. A tie will keep the standings constant and return the Beavers loop champs for the third straight year and for fourth time in the last five seasons.

Affable Hunter coach, Morton Thompson, felt the "Not as a Stranger" man, has a strong forward line featuring a group of good scorers, but admits to a "real weakness" on defense, where his backs lack the stickling abilities of such far-hosting Beavers as Robert Lestere and Eddie Tolle.

"We try to get around this," Thompson said, "by having our defensive run as fast as possible to get the ball up to the forwards.

"Once we're on the attack, things are different. I have four good scorers who can worry the defense. My best man is Gabe Schiffer, the center half-back, and I'll tell you right now that you won't swap him for your Vahe Jordan or even your All-American, Johnny Koutsanis.

"This boy Schiffer," Thompson continued enthusiastically, "is the best all-around player in the East. He's as fast as a bullet, can set up plays and do plenty of scoring himself. In addition, he's great on defense. He bottled up Pete Meyer of Queens when we beat them, 2-0." Meyer is 5-11 All-City halfback who gave the Lavender fit as Queens tied City earlier this year to mar the Beaver perfect record. The only rub is that Schiffer will probably transfer to City next year to take engineering.

Thompson also has Bob Perez, Gabriel Diaz and Lance Smith to complement Schiffer on the Hawks' firing line. Richard Borow is a solid goallie whom Thompson ranks as the best in the Met area.

Beaver Cindermen Lose;
Gaels Victorious, 22-34

"The show must go on!" And so it did last Saturday at Van Cortlandt Park in the Bronx when Iona College's cross-country team defeated City drenched course.

O'Donnell Joshua of Iona raced across the finish-line with a time of 27:16 to cop individual honors in the dual meet. The Gaels John Connolly and Jack Goldstein also took second and fourth positions with times of 27:35 and 28:20 respectively.

The first Beaver harrier to Joshua, earlier this season, ran a 26:45 time against a Montclair State harrier. In addition, he's great on defense. He bottled up Pete Meyer of Queens when we beat them, 2-0." Meyer is 5-11 All-City halfback who gave the Lavender fit as Queens tied City earlier this year to mar the Beaver perfect record. The only rub is that Schiffer will probably transfer to City next year to take engineering.

Thompson also has Bob Perez, Gabriel Diaz and Lance Smith to complement Schiffer on the Hawks' firing line. Richard Borow is a solid goallie whom Thompson ranks as the best in the Met area.

Holman Optimistic After
One Week of Practice

"We may surprise." This is the opinion of Coach Nat Holman when queried recently as to the forthcoming basketball season. He added that the team has exhibited "nice spirit." good team play and, with a lot of work, will work out fine.

Holman concedes that the main factor working against him is time. With less than a month to go before the season inaugural, and with only one week of practice under his belt, he must mold a solid nucleus and develop a strong reserve outfit.

Newcomers Hector Lewis and Teddy Brimat are looked to for much needed help. The 6-6 Lewis hails from British Guiana and is one of the fastest men on the squad. He first picked up a basketball two years ago and is reputed to be a natural athlete. Brimat, 5-8, fast and tricky, is an all-around hustler.

Also on hand will be captain Lou Berson, another speed merchant; Ralph Schefflan, 6 feet and a good scorer; Bill Lewis, Merv Sherr's understudy last year; big, brouncy George Jensen, who relied upon for rebounding and tall, lanky Syd Levy, a Harrow School student, will undoubtedly cause other teams to be troubled because of his 6-8 frame, according to Holman. He added that Levy may look a bit awkward, but with practice will improve.

Holman is working against the clock. The Lavender will have to
