Budget Unit Defers Action on Chancellor
A move to create the position of Chancellor of the five City Colleges was temporarily halted Thursday when the Board of Estimate, under fire from the City College Alumni Association, postponed any action until May 23.

Speaking for the Alumni Association, Murray A. Gordon, '41, attorney, charged that "to set up the office of chancellor as proposed would revolutionize the present structure of the municipal college system."

Referring to reports that Deputy Mayor John J. Thedore, Jr., was dining room chairman, Gordon asserted that his organization was "strongly opposed by this indication that a 'black deal was in the making.'"

Two other speakers, George Roth of the City College Faculty Association and Mrs. Mary F. Barnes, a student in the Staten Island school system, Need Breathe's Sanction Space Survey Reveals Additional Office Shifts
Additional space changes at the Baruch School were announced Thursday by Dean Emmanuel Saxe.

The library on the third floor will be moved to the third floor of the Maintenance Department office. The Library Reading Room, 305, and the Curricular Student Office, 205, will be interchanged. As a result, the second floor will virtually be a list of libraries.

The basement room will be temporarily available for police science classes. The courses will be moved to 506, the latter to line up to the Psychology Building.

Will be a number of changes on the eighth floor. The chemical preparation lab will shift to 607, the latter to be used for other purposes.

The tenth floor cafeteria, the dining room will be converted to a stock room with a faculty room to be built. The cafeteria will be used as an additional cafeteria. Maintenance, formerly used as a stock room, will house student offices.

TICKER! TICKER Association is accepting applications for Editor-in-Chief and Business Manager for the Fall 1957 semester. Dislikes Gallagher Statement:
Segregationist Refuses to Speak

A proposal to send an official observer to the World Festival in Moscow this summer was sent to a committee for further study. The proposal was ordered to report to Student Council by Thursday.

The Board has held every other year since 1947 in a different East European capital. At the last Festival in Warsaw, 30,000 students were reported in attendance.
The Baruch School's chapter of Pi Delta Psi awarded honorary accounting fraternity, has dedicated itself to providing quality education and mentorship to its members. Its members include Steven Grossbard, Ronald A. Kaplan, Jay K. Pohoryles, and Philip J. Smith. Other members are Robert M. Blumberg, Eugene Stein, and others.

The chapter was founded in 1956 and is open to students who meet certain criteria, including a high GPA and a commitment to professional excellence. Its officers include President Brian Rose, Vice-President Edward Sullivan, Secretary Kenneth Farkas, and Treasurer Arnold C. Shafran. The chapter meets regularly to discuss various issues and to provide support to its members.

The chapter has been involved in various activities, including fund-raising events, social events, and community service projects. It also sponsors a number of other organizations, including the Baruch School's Armed Services Committee, the Baruch Society, and the Baruch College Model United Nations Program.

The chapter has a strong tradition of excellence, and its members are expected to maintain high standards of professionalism and leadership. The chapter continues to be a leader in the field of accounting and is recognized for its contributions to the profession and to the Baruch School community.
‘9’ to Play Hofstra In Met Test Today

City College’s baseball team will face Hofstra College today in Hempstead, Long Island, in a Metropolitan Baseball Conference game.

This is the second meeting of the campaign for the two teams. Tony Lucich, City’s other co-captain, is probably lost for the season. Lucich was called off Saturday due to wet grounds.

Rejuvenated? Faculty Readies for Student

In what amounts to the grudge game of the season, the Baruch School faculty will take on the students Thursday at 12 in Hansen Hall. The faculty will be looking for its eighth victory in a row.

Leading the all-star array of faculty “performers” will be Gerald “Bleed” Klot, who has starred for the faculty for several semesters. A year ago, he won an award for his sportsmanship and play in the game. Others to play for the “oldsters” include “Buffy” Brand, “Mi Panda” Kwartzler, “Phoney” Kertemacher, “Big” Strum, Jack Ross and R. Sobovinsky.

Last semester, the faculty, in their seventh fray in a row, scored 20 points to lead the squads, while Jack Ross folks went seventeen to pace the students. Klot and Brand scored twice.

Thursday, THE TICKER the Intramural Board, 14-12.

“Business and pleasure do mix...”

ROBERT H. WENTORF, JR., Ph.D., University of Wisconsin, 1951

Until I joined General Electric’s Research Laboratory in 1951, I never realized science could be such a challenge — or so much fun. My job involves research in physical chemistry, the investigation of new ideas which can lead to new and better products. I use in a company of this size, I have the unique advantage of having the tools and facilities I need and the experience of others close at hand. And in return, of course, I’m expected to apply myself to the best of my ability in each new job. As I see it, if a big company like General Electric invests time, money and faith in my creative ability, and if I respond by creating, then we both benefit. To me, at General Electric business and pleasure do mix.”

The achievements of 31-year-old Robert Wentorf are a testimony to the opportunities offered at General Electric. He recently created borazon — a completely new, diamond-hard substance which promises far-reaching effect on industrial processes and everyday living.

There are more than 27,000 college graduates at General Electric. Each is provided the opportunity for self-development in the hope that his creative ability will bring forth new ideas. As General Electric sees it, these new ideas, stemming from man’s native curiosity, will lead to the development of countless products we now take for granted. 

A physical chemist at General Electric conducts studies of the atomic structure of matter, and of the way atoms and molecules interact under various conditions.

Progress is Our Most Important Product
