Faculty to Discuss Speaker’ Proposal

The General Faculty will meet tomorrow to discuss President Buell G. Gallagher’s “speakers-on-campus” proposal. The meeting, which is closed, will take place in the Baruch School.

The plan, which states that there should be “no ideological or organizational restriction imposed on the issuing of invitations to visiting speakers,” The General Faculty exercises oversight over extra-curricular activities at the College. The by-law of the Board of Higher Education charges the faculty with supervision of these activities.

President Gallagher has proposed his proposal so that “City College might continue to be a center of free inquiry and of free debate.” The following are the main points of the plan:

1. “A speaker or performer may be on campus at the College on invitation extended by a regular-organized student organization or by an individual, with his permission. Neither his point of view is to be recognized nor repugnant.”

2. “City College ought very strongly to the Interfraternity Congress, since it has been repeatedly requested by the Council to stop inviting speakers.”

3. “The Baruch School is having its face lifted. The BHE has barred persons” and “the possibility of dissatisfaction.”

4. “This report presented to the National Interfraternity Congress in December was supported by the Board of Higher Education.”

5. “The Baruch School has been awarded the contract to a cafeteria floor mezzanine to a cafeteria with vending machines after the lighting is changed.”

6. “The architectural and engineering unit of the Board has been awarded the contract for the lighting improvements.”

7. “The contract was delayed when the company made an arithmetical mistake in its original bid, according to a spokesman for the College’s Business Manager.”

8. “The speech was given to the College.”

9. “The signal system in the elevators and the ventilating system in the visual aids room will be improved as part of the program.”

The signal system in the elevators and the ventilating system in the visual aids room will be improved as part of the program.

Steam Blasting Starts School Improvements

The Baruch School is having its face lifted. For the next few weeks, workmen of the Standard Waterproofing Company will be steam blasting the north and west walls of the building.

During a five-day week, the crew of 20 workmen will use a low pressure blast pipe, which uses water under pressure to water-proof the building and a hose, forcing blasts of steam, to clean the walls. After this process on

The walls are completed, the windows will be painted from the outside.

As a part of the redecorating program, the School will undergo a conversion of its electric current from direct to alternating current. New lighting fixtures will then be installed in the classrooms.

Work is expected to begin on the conversion of the seventh floor mezzanine to a cafeteria with vending machines after the lighting is changed.

The Architectural and Engineering Unit of the Board of Higher Education reports that the Hyder Electric Company has been offered the contract for the lighting improvements.

The contract was delayed when the company made an arithmetical mistake in its original bid, according to a spokesman for the College’s Business Manager.

The contract will not begin until the contract is processed by the controller’s office at City Hall. The signal system in the elevators and the ventilating system in the visual aids room will be improved as part of the program.

Hunter Mentor Set
For City Encounter

By Marv Levy

Motivated by twin defeats at the hands of the City College quintet last season, Hunter College basketball coach Mike Fleischer hopes to have his team in mid-season form for Saturday’s battle at the Hunter Gym.

Led by Dave Alpert and Dave Miller, both 6-4 veterans and Ed Ivy, Brorman, Hunter has the height necessary to counteract 6-5 Bob Silver, 6-6 Hector Lewis, and 6-6 Joel Ascher, City’s big men.

Barry Falt, 5-10, who played well against City last year, is the Hawk’s top playmaker. The fifth starter is Harvey Barvatin, who, at 6-10, plays backcourt with Falt.

Fleischer realizes that although City lost 6-9 Syd Levy, Lewis and Barvatin Silver are valuable assets and have improved since last year. The rapid improvement of these two cause him to be skeptical of the Hawks’ success.

City Coach Dave Polansky will start Silver and Ascher at the forwards, Lewis at center, and Joe Russo and Stan Friedman in the backcourt slots. Barvians Marty Groveman and Mike Gom- in the backcourt slots. Barvians Marty Groveman and Mike Gom-

score and take the lead for the first time in the half as Wallit connected with two jump shots. The Lions roared back on a three-pointer by Phil Matthews and a layup by Stan Needleman to take a 30-26 lead.

After two successful foul shots by Wallit, Needleman again scored on a layup to maintain the Lions’ three-point margin. Followed by one-pointers by Ascher and Lewis, Wallit stole the ball and tallied on a layup to give the Lions a 42-41 lead, which they never relinquished.

Bus

Tickets are now available for the 45 Club’s trip to Garden City, Long Island, for the City College–Adelphi basketball game, Saturday, December 14. Doors open at 2 p.m. and may be obtained in the TICKER office, 911B.

The bus will leave from the School at 6:30 and will return approximately midnight.

Coaches May Revise Met Soccer Loop Plan

A meeting will be held tomorrow to determine the future of the Metropolitan Intercollegiate Soccer Conference.

The meeting is the annual gathering of the six league coaches. A majority of those attending are in favor of some sort of revision in the present set-up of the league.

The existing set-up has four teams in one conference and five teams in the other. It was split according to their finish in the 1956 season, the odd-numbered teams in one division and the even-numbered teams in the other.

Brooklyn College coach Carl Reilly is the only proponent of the existing situation.

Beaver Coach Harry Karlin is in favor of reorganizing the league into one conference, but having each team play only six other league foes. The other gain would be played with non-league opponents.

This set-up would permit City fulfill present home-and-home agreements with Rensselaer Polytechnic Institute, Brooklyn State Teachers College and Temple University. The Beavers are limited to ten games a season.

George Davis of Pratt Instit- ute dislikes the set-up because of the difficulty in selecting A League stars.

The present set-up would allow coaches from one division to select players from another division, since they have not selected those players.

Karlin thinks it very unlikely that the Beavers will leave the league altogether. "I'm sure we'll reach a compromise," he said.
