“Ethics and Economics,” discussed by Gallagher

By Marilyn Karlin

During Dr. Gallagher’s student days the country was in a state of progress, but instead of turning to communism as some of his fellow students did, he said he began his research into what has since proved to be “a continuous interest in ethics and economics.”

According to the President of City College, “Ethics is the science of morality; economics is the science of wealth.”

Dr. Gallagher said that he spoke in the hope that one student would listen and perhaps devote himself to the ethical issues of economics.

He feels that much has been done in this field, but much more remains to be done.

The President stated that some students believe that a business career has three steps to get on, to get on, and get honest. However, Dr. Gallagher maintained that “The difference between selfishness and altruism is as be- tween night and day.”

To stress the importance of both in economics, Dr. Gallagher cited two examples. The first was the 110-year strike of 1950-51. During the strike he was on the National Council of Churches’ committee studying the strike. This committee published their report “In Search of Maturity in Indus-

Gallagher Speech...

A highlight of the day was the speech made by Mr. Gallagher. His message was one of hope and encouragement. He urged the students to take advantage of the opportunities available to them and to make the most of their time at the college. He also reminded them of the importance of the upcoming election and asked them to vote in it. Mr. Gallagher's speech was well received by the students and it is hoped that it will be the motivation they need to get involved in the election process.
