Philosophy Students Announce
Actions To Maintain Grades

A determined group of students who were in Dr. Fred Newman's philosophy sections last semester have begun to initiate action in an attempt to avert rejection of the grades they received.

Thirteen students have formed a Steering Committee after some sixty students met with Dean Emanuel Saxe and Professor Michael Wyschograd (Philo.) Thursday to exchange views on the controversy. The meeting, held in the Faculty Council Room, was closed to all other persons including members of The Ticker and Student Council. One faculty member, Dr. John Bauer (Psych.), made an attempt invain to sit in on the meeting.

Both Dean Saxe and Professor Wyschograd offered little comment on the activities of the meeting, but students present there were more than willing to disclose the information.

Dean Saxe said that no final decision had yet been reached. Students reported that their next meeting with Dean Saxe is scheduled to take place in "about two weeks."

According to students, Dean Saxe is definitely rejecting the grades filed by Dr. Newman, who is now teaching Uptown, and will use the ensuing two weeks to decide whether or not to accept or reject the "compromise" plan that was suggested by Professor H. Standish Thayer, who presides Uptown as chairman of the Philosophy Department.

The compromise, which would give the students a "F" (Fail), or a possible "A" or "B" if they decide to take an exam or submit a paper, results from two alternatives which were first proposed by the Uptown department. The original alternatives were to (1) accept the marks as they were, or (2) completely disregard the course and insist that the students take the course over. Both were deemed unfair.

Six members of the Steering Committee will meet with Professor Thayer "as soon as they can." The entire committee will then meet shortly thereafter to discuss the outcome of the meeting. A general meeting of all students (Continued on Page 8)

Council Budget Approved:
Saxe Welcomes Members

Student Council's operating budget was approved with little objection at its meeting Thursday.

Major areas for budget debate were concerned with the $600 needed to send two students to the National Training Laboratories at Bethel, Me., and an appropriation for an election supplement in The Ticker.

Dean Emanuel Saxe welcomed the Council during the early stages of the meeting and discussed the recent completion of the Baruch School Master Plan, which has been submitted to the Board of Higher Education.

Associate Dean of Students David Newton proposed an increase in the consolidation fee and outlined areas connected with the new Baruch College that require greater funds.

Council also decided to look into the grade dispute that has erupted in the Philosophy Department. Further discussion on the matter is expected at this Thursday's meeting.

A Master of a Plan

All the statistics, tables and graphs that are found in the Baruch Master Plan are, however, not new to us. These are the results of a long-term effort to compile accurate data. The Baruch College President, Dr. Ralph Chen, has presented this plan to the Baruch faculty and staff. The plan outlines the future of Baruch College and the goals that are set for the next academic year. It is important to note that this plan is based on the work of the Baruch College Planning Committee, which is composed of faculty, staff, and student representatives. The plan is a comprehensive document that outlines the goals and objectives of the college for the next academic year.

Facility Questionnaire

In order to obtain information that is useful to planning for the Baruch College, the Ticker would appreciate it if faculty and students could complete this survey. The survey is designed to gather information on the facilities and equipment that are available to the Baruch College community. The survey is anonymous and all responses will be kept confidential. The results of the survey will be used to improve the facilities and equipment that are available to the Baruch College community.

Winokur Resigns

Professor Paul Winokur, who has been the chair of the English Department, has announced his resignation. He has been a member of the Baruch College faculty for many years and has made significant contributions to the college. The Baruch College community is grateful for his service and wishes him well in his future endeavors.

The Slow Reader

The slow reader is interested in understanding the world around him. He is slow to comprehend and is not easily swayed by popular opinion. The slow reader is also interested in understanding the world of art and literature. He is interested in understanding the world of science and technology. The slow reader is also interested in understanding the world of politics and economics. The slow reader is also interested in understanding the world of religion and philosophy.

Investments

If your major is listed here, IBM would like to talk with you March 15th.

Sign up for an interview at your placement office—even if you're headed for graduate school or military service.

Maybe you think you need a technical background to work for IBM. Not true. Sure we need engineers and scientists. But we also need liberal arts and business majors. We'd like to talk with you even if you're in something as far afield as Music. Not that we'd hire you to analyze Bach fugues. But we might hire you to analyze problems as a computer programmer.

Whatever your major, you can do a lot of good things at IBM. You can change the world (maybe). Continue your education formally, through plans such as our Tuition Refund Program. And have a wide choice of places to work (we have over 200 locations throughout the United States).

What to do next
We'll be on campus to interview for careers in Marketing, Computer Applications, Programming, Research, Design and Development and other technical and non-technical positions. If you can't make a campus interview, send an outline of your interests and educational background to P.J. Kessler, IBM Corporation, 425 Park Avenue, New York, New York 10022. We're an equal opportunity employer.

Students Plan Action in Grade Dispute

(Continued from Page 1)

Students said that Dean Saxe is not accepting their grades because, according to the dean, there is no evidence that the required work for the course was done.

There was no final exam given by Dr. Newman. There were three small papers assigned, but because they were group projects, the merits of the students as individuals could not be determined, Dean Saxe reported.

Earlier Thursday, one student said:

"If we didn't learn, it wasn't our fault; we just didn't teach. We not only occasionally with him. He didn't think it was his responsibility to teach us, and sometimes, did not show up for two or three consecutive days."

"He did not care about the subject matter, and we learned nothing about logic and ethics. Most students didn't agree with his methods of teaching, but there was nothing we could do about it."

During Thursday's meeting students expressed extreme disappointment. Some suggested that the course they took be considered as an elective and that the awarded grade be accepted. In conjunction with this proposal they suggested that they take another course in philosophy that would be considered "mandatory."

According to a student report, Dean Saxe said that he was embarrassed at the situation and regretted that a normal grade distribution had not been filed. Students complained that it was not their fault and asked what would have happened if, instead of "A's", they were given "D's" or "F's" which they said had happened in the past.

Dean Saxe said that he had no knowledge of such a situation.

Several students walked out of the meeting.

Professor Thayer said that the situation is completely in the hands of Dean Saxe. He confirmed the fact that the papers, handed in to Dr. Newman last term by students, had not yet been presented by Dr. Newman.

Professor Thayer said that he knew nothing of a grant that Dr. Newman is reported to have been awarded. One of Dr. Newman's students said that last semester he told him that he was on a $65,000 grant. Dr. Newman was also reported to have told the student that he was having difficulty securing from the College funds that he is entitled to.

Dr. Newman was not available for comment.

(Continued from Page 2)

We cannot keep their feet firmly planted on the ground."

Those who have the extra four years of book learning will tell themselves that they are protecting their country or another country from the evils of the Communist ideology. The men who have not read quite as much will be able to answer the question "What the heck am I doing here?" with a more realistic answer. These men face the grim reality that they are caught in a moment of time in which they are called upon to perform a highly dangerous and ugly act. They accept this responsibility and perform the act to the best of their ability.

Peace is certainly something to which we must strive. However, only in meeting force with more force can we show the futility of war and the benefits of peace.

The lasting peace that we hope for can only be achieved on the battlefields of Vietnam because that's where it's happening baby—foot on Whitehall Street.

Hillel Speaker

Tuvia Friedman, the capturer of Adolf Eichman, will be Hillel's speaker in their first "Meet Our Guest" luncheon this Thursday at 1.

Mr. Friedman, director of the Institute for Documentation, an organization committed to the search for Nazi war criminals, is the author of "The Hunt for Eichman", which deals with his tracking of Eichman.

Tickets are seventy-five cents and reservations must be made by tomorrow at 8:30 at Hillel House, 148 East Twenty-fourth Street.

Now, that's a pretty funny thing for a civilian firm to say. A boss? Right out of college? The first day?

As an officer in the world's largest technological organization you're a leader. Engineer. Scientist. Administrator. Right where the Space Age breakthroughs are happening.

Or how about the executive responsibility of a test pilot clocking 2,602 mph in a YF-TZA jet? That could be you, too.

But you don't have to be a pilot in the Air Force to move fast. With your college degree you zip into Officer Training School. Crunch out an officer, speed on throughs are happening. Throughs are happening.

The Air Force moves pretty fast. Think it over. A man's career can sometimes move pretty slow.
