Council Meets on Budget
Money Circus Rides Again

by TOM SWIFT

As in par in the case of Student Council voting on appropriating club budgets, last Thurs­days, and his being face, eyes­,­

dom, high emotion, humor, insults, proficiency and prayer. Just like the big politics do it, but it's too easy to criticize when I myself have fallen into the same pits.

Adding to the excitement of "budget time" this meeting had to deal with the problems of filling vacant seats on Council, due to what some active students like to call (and it is mentioned at every Council meeting) student apathy. Open seats on Council included the executive secretary, the two of the class of '72 and two reps, three reps for '71, and three more for the seniors.

Now ordinarily this would not be a very "dominating" event, but remember this was the meeting to decide on club and Student Council's budgets. So as to make this a matter of controlling, some provisions were made. No member (not the faculty), any mem­ber or members appointed at a meeting and his being face, eyes­,­
dom, high emotion, humor, insults, proficiency and prayer. Just like the big politics do it, but it's too easy to criticize when I myself have fallen into the same pits.

According to the rules, these vacant seats shall be "allocated" and not vetoed on those budgets. This is to prevent fixing club budgets then resisting this. Of course, in any case when the word constitution is muttered, brought about a cry from some members — "Repeal it!" "Suspend it!" while the more conscientious wall, "Only one.Obviously, the whole course, special orders were called for on this matter. Therein debate for three? A student (against repeal) as any student can at a meeting. The motion failed.

By John Schorohod

As was reported in last week's Ticker, all B.B.A. students who will receive their degrees after September 1, 1970, are required to take Statistics 387, and all students who will become seniors in September 1970 and thereafter are required to take Business Policy 100 for the B.B.A. degree (under the new curriculum).

Not wanting students to be further burdened by additional required courses, The Tick­der did some investigating into the chon­ology of the moves that made these courses mandatory, and what was found leaves a bad taste in the mouth...

The new business curriculum was approved on April 23, 1969, to become effective in September 1969, with the exception of Stat. 357 and Business Policy 100. Therefore, when students are asked to take the new curriculum, they did so with the understanding that these two courses would be good for the students. Don't you just love being told what's good for you? Anyhow, there are some more factors in this case that cause one to think that there is something rotten in Denmark (or in Baruch, as the case may be).

Our all knowing administra­tors, for some unexplained, and probably not too good reason, gave this new information a

 minimum of publicity. No notice was sent around to classes informing students of the change, nothing was put in the Curricul­um Handbook to indicate that Stat. 357 and Bus. 100 would be required. Actually, the only no­tice of the action was a small no­tice, submitted to The Ticker. Why the big secret, boys?

In interviews with Frank Sael­del, Dean of Curricular Guidance, and Jerome R. Cohen, Dean of the School of Business and Public Ad­ministration, the rational behind the making of the two courses — mandatory was the aforementioned "they are good for the stu­dents (this is not a direct quote, but it accurately expresses the latent)." There were no sound reasons for making them retro­active.

It was told that if the students didn't want to take the two new courses, they could always go back to the old curriculum. Big Deal! The very implication, no

would choose to rebel. It's what took the new curriculum because it gave us a taste of freedom. After you've had a taste of freedom, would you want to go back to a dictatorial system?

There are several very objec­tionable features to the adminis­tration's actions in this case. One is that if we let them get away with making an ex post facto re­quired course, then it sets an un­pleasant precedent. It will enable them to saddle us with more and more requirements whenever they feel that a course "would be good" for us.

Steve DePasse Sings Up Storm Receives Standing Ovation

by Robert Barrett

The man has done it again! Steve DePasse has faced the audi­ence of Baruch and has ac­quitted it. The standing ovation that he received from the stu­dents expressed their love for DePasse and his being face, eyes­.

The show started he was given a "Welcome to Baruch" and the band began, and nearly six months after stu­dents had chosen the new curric­ulum. It would seem that the

It's been quite an experience for some unexplained, and probably not too good reason, gave this new information a

minimum of publicity. No notice was sent around to classes informing students of the change, nothing was put in the Curricul­um Handbook to indicate that Stat. 357 and Bus. 100 would be required. Library To Move To 24th Street

The College Library plans to move to the RCA Building on 24th St. and create facilities sometime in the future.

The move is tentatively planned for Summer 70, but a more likely estimate is during inter­session of 70-71, according to Mr. Harold Elberson, acting Chief Librarian here at Baruch College.

Elberson, who has been with the Baruch staff for 36 years, further explained that the plan­ned library would occupy the enti­re 7th floor and one-third of the 6th floor in the RCA Build­ing.

Mr. Elberson added with a wink, "Being a librarian, I feel embarrassed that it is not enough.

The new library will be fully air conditioned and present plans include carpeting.

In contrast to present facilities, the new library will allow open access to most of the books by the students. This will include books and bound periodicals. Only current periodicals and reserved books will require librarian as­sistance.

Classroom instruction pro­grams, which will operate in small­er, conference rooms, are planned. These programs are de­signed for classes of 30 or more and utilizing the specialized (i.e., law, accounting, psychology, etc.) sec­tions of the library.

In addition to the RCA facilities, the stack area of the pres­ent library will be retained as a repository with the possibility of an adjoining reading room.

Elberson told reporters that the new library will occupy approx­imately 34,000 sq. ft. in the RCA Building. The current library

Curricular Guidance

Prof. Aaron Levenstein on Senate Committee

The Curricular Guidance Office is trying an experimental this term of counseling Day Division students without advance appointments. It is feared that time will be saved in the process. Counselors of orientees are held in the order in which decisions were made. "We have tried to do the best for every student," said the director of counseling.

In the final analysis, only through the student body. This means from 700 to 1900 more students should be able to be served as a result.

Mr. Elhersen noted that a good majority, estimated by 65% of the capacity, will be used over Baruch's present library.

"Free is insufficient for the student's needs," Mr. Elhersen said. "We have a print overload which the library cannot cope. We are overloading the library."

The process of club allocations with elections and the fussing is in serious trouble, more members would be measured by the amount of bookkeeping adjustment the New Student Committee sets this task as its goal.

The students in the office of the Student Senate are working on the establishment of a Senate Open Admissions Committee. The College, the Senate Open Admissions Committee of the Senate, the Senate. Admission: Bring This Ad & PJA.

We have not only the last couple of weeks, but this entire generation of college students seem to be unaware of this problem and are paying no attention to it. We have been accused of being naive and unprepared for the realities of the world. But we are not the only ones who have been the targets of criticism. The very people who are supposed to be our leaders, the students, are the ones who are most affected by this situation.

We recognize this problem. We understand the need to prioritize in other fields, but we cannot ignore the importance of our own education. We know that there is a need for a new kind of education, one that is more focused on the needs of students and the world around them. We are better off admitting this and distributing credit as well.

If sufficient interest exists, this 3-credit course will be offered during the 1970 Summer Session. If you are interested, please contact Mr. Booke, in Boom 907A, prior to March 4, 1970.
