Off the Wall

February 8, 1971

In the Feb. 12, 1971 issue of the Baruchian, I wrote an open letter to the student body. I have been asked to repeat this letter as a fulsome response to the administration. The letter was written in an attempt to clarify some of the problems facing our school today, and to offer some suggestions for improvement. I hope this response will be helpful in addressing the concerns that were raised in my previous letter.

Sincerely,

Jim Dennis

People are more likely to return a lost wallet if a letter found in it says that a previous finder had planted it to try and win prizes to return it intact.

In an experiment described in February, SCIENCE NEWS, a Columbia University group deliberately dropped wallets containing money on New York streets. Letters from fictional "previous finders" slipped into some of them led the real finder to assume this was the second time the wallet had been lost. When the letter was positive and friendly, 70 percent of the real finders returned the wallets. When wallets were dropped "as is," only about 60 percent came back.

Making up a name can work. First, invest $10 in a pair of the best magazines and read them cover to cover. Second, go to a large magazine shop for journalists and find the best way to sell an article or feature to make a name for your work. After he has paid the first and the final check, you'll have a good name for your work, which is to say that you've got a good name for your work. But it's a free ocean to sail in, and more rail as free as air can be...
