EMERGENCY
CITY HALL
RALLY

Millions of dollars are about to be slashed from the current City University budget. Unless we act now, courses will be cancelled, people fired, classes jammed, accreditation jeopardized, and the CUNY degrees watered down.

Next on the chopping block: Free Tuition!

SAVE CUNY

Students, faculty and staff must show their unity now. If we don't care about preserving a free City University, who will? We must show our determination to stop the dismantling of our university.

Once More...

We most earnestly request that all members of the Baruch College Day Session community—that is to say, students, faculty members and administrators—join in the City University protest against the proposed budget cuts. Recent history has adequately demonstrated the precariousness of our budget, for the sake of scholarly pursuits (tacitly) on the University budget. Each dollar counts. Therefore, we urge that the students, faculty members, and administrators pay close attention to this issue.

Baruch's Problem

While Baruch College President Dr. W. J. Hemberger refers to the "impartial" statement as "a true statement," we believe that it is not an impartial statement. We are concerned about the possible implications of the statement and the way it may be perceived by the students.

The Dean has indicated that the initial $15,000 cutback in the budget would be an immediate reduction in personnel. However, it is not clear what kind of personnel would be affected by this cutback.

The figure being discussed is approximately $0.9 million. The budget for the college this year is approximately $12 million. The $0.9 million cutback represents approximately 7.5% of the budget.

The Mayor, after consultation with the Chancellor of the City University, proposed a series of budget cuts. The cuts would affect the following programs:

1. A reduction in the number of students in the College's Science Laboratory to the limit of the space available.
2. A decrease in the number of courses offered to the student body.
3. A reduction in the number of faculty members.
4. A reduction in the number of programs available to the students.

While these cuts may seem minor, they could have serious implications for the quality of education at Baruch College. We urge all students to take an active role in fighting against these cuts.

Who Started It All

A footnote of what may be in the fall's news is the study of Baruch College's student body. This study, conducted by the students of the Science Laboratory, is aimed at understanding the dynamics of the student body.

The study will involve the collection of data on the following variables:

1. Age
2. Gender
3. Major
4. Grade point average
5. Hours spent studying per week
6. Extracurricular activities

The data will be analyzed to determine the characteristics of the student body and to understand the factors that influence student behavior.

The study will be completed by the end of the semester. The results will be published in the next issue of the student newspaper.
