Baruch Holds Splash

No Water, But What A Blast

By Bob Lipson

The Public Relations Society, assisted by Day Session Student Government, staged an annual campus for a day. This year's program was dubbed "Splash "75," which consisted of: a continuing program of active resistance against proposed reductions in the University's 1975-76 budget, an increase in general fees and graduate school tuition.

Though visible protests and demonstrations, telegrams, letters and personal appeals, once again we are confronted with the knowledge that further cuts would permanently destroy the quality of the Baruch University that our predecessors have worked for public relations careers. I could not be prouder to be the faculty advisor to the Public Relations Society, had this to say.

Mr. Robert Chamblee, the faculty advisor to the Public Relations Society, had this to say. "The event has been ideally organized for the most efficient, enthusiastic group of students and faculty that could be found in the New York City area. These students are ideal potential for public relations careers."

Baruch has awarded almost half a million dollars to students; faculty, staff, and alumni to meet with members of the New York City Council. We believe that this kind of activity should also take place at a local campus level, coordinated through student government and chapters of NIPA. The Baruch University remains a prime target area. Our educational program is in need of our help. All City Councilmen can be reached at 556-5068. Key leaders in this regard are Majority Leader Thomas J. Cuite (556-3250) and Finance Committee Chairman Mathew J. Troy (464-4800). Telegrams should be filled sent to your local Chairman.

1. A series of visible protests and demonstrations, telegrams, letters and personal appeals, once again we are confronted with the knowledge that further cuts would permanently destroy the quality of the Baruch University that our predecessors have worked for public relations careers.

2. In an effort to reach these elected officials who possess key decision-making authority over the 1975-76 fiscal budget, we are coordinating a series of "lobby days." On a University-wide level, we are organizing teams of students, faculty, staff, and alumni to meet with members of the City University. Our educational program is in need of our help. All City Councilmen can be reached at 556-5068. Key leaders in this regard are Majority Leader Thomas J. Cuite (556-3250) and Finance Committee Chairman Mathew J. Troy (464-4800). Telegrams should be filled sent to your local Chairman.

3. Each of the Borough Presidents occupies a seat on the Board of Estimate and yields two votes apiece out of a total twenty-two. The Mayor, Comptroller, and City Council President cast four votes each. Appointments, by which, and letters should be directed to the Borough Presidents in order to secure their assistance:

Manhattan — Percy E. Sutton (556-3220).

Queens — Donald R. Manes (556-3220).

Rochester — Robert T. Conner (556-3220).

Bronx — Robert Abram (293-9000).

Brooklyn — Sebastian Leon (843-2054).

Mayor Beame must be reminded through visible and vocal participation.

Out Of Uniform...

In the midst of the Vietnam War, a young man was killed. He was a U.S. Marine, and his name was Robert O. "Bill" Rivera. He was just 26 years old, a private first class, and a member of the 26th Marine Regiment. His death was a loss not only to his family, but to the entire country.

Bill had been a Marine for only a short time, but during his short stint in the service, he had shown great promise. He was known for his courage and dedication, and he was loved by his fellow Marines.

After Bill's death, his family and friends were left to grieve. They searched their memories, trying to make sense of why such a young and promising life had been cut short.

"I asked myself why," one friend said. "I thought of them, the people who were so close to me, and how their lives would be forever changed by Bill's death."

The war had taken a toll on everyone involved. It had changed lives, and it had left a lasting impact on those who had been part of it. Bill's family and friends knew that they would never be the same again.

But even in the midst of this tragedy, there was a sense of hope. For those who knew Bill, his memory lived on, and they knew that he would always be with them, even in death.

"I made my peace," one friend said. "I accepted that Bill was gone, but I knew that he would never truly leave us. His spirit would live on, and he would always be a part of us."
The following story was told by a student who had been studying under Prof. X. Schwalbe for several years.

At the beginning of the spring semester, the student was assigned to work with the Innocent Jones, Jr. in the new laboratory. The Innocent Jones, Jr. was a young man who had just completed his degree in physics and was beginning his professional career. The student was excited to work with this new and promising talent.

The student and the Innocent Jones, Jr. began their collaboration immediately. They worked together on various projects, including experiments on the properties of matter and the development of new technologies. The student was impressed with the Innocent Jones, Jr.'s ability to think critically and to approach problems in a creative manner.

One day, while working on a particularly challenging experiment, the student noticed that the Innocent Jones, Jr. was often lost in thought. The student asked what was bothering him, and the Innocent Jones, Jr. replied that he was concerned about the future of physics.

"I don't know if we're making any real progress," the Innocent Jones, Jr. said. "The current theories don't seem to be able to explain everything."

The student agreed that there were many unanswered questions in physics, but he also believed that the field was moving in the right direction. "I think we'll find the answers eventually," he said. "We just have to keep experimenting and exploring."
Guide To A Safe And Healthy Vacation

By Richard Rodriguez

The summer vacation has arrived. It's the time of year to travel, to explore new places, and to relax in the sun. But with the heat comes the risk of sunburn and heatstroke, so it's important to take steps to stay safe and healthy. Here are some tips for a safe and healthy vacation:

1. Use sunscreen: Sunscreen is essential for protecting your skin from the harmful rays of the sun. Look for a broad-spectrum sunscreen with an SPF of at least 30, and reapply it every two hours or after swimming or sweating.

2. Stay hydrated: Dehydration can cause symptoms like fatigue, dizziness, and even heat stroke. Drink plenty of water throughout the day, especially if you're exercising in the heat.

3. Protect your skin: Wear long-sleeved shirts and hats to protect your skin from the sun. Avoid direct sunlight between the hours of 10 a.m. and 4 p.m., when the sun is strongest.

4. Stay cool: Take breaks in the shade or indoors to avoid overheating in the heat. Use fans or air conditioning to keep your cool.

5. Be aware of your body: Listen to your body and pay attention to any signs of heat stroke, such as extreme fatigue, confusion, or a high fever. If you or someone else experiences these symptoms, seek medical attention immediately.

Open Admissions

Brody Speaks On Open Admissions

Brody is excited about the college's open admissions policy, which means that any student, regardless of grades or test scores, can apply and be accepted.

"This is a great opportunity for students who may not have had the chance to go to college before," Brody said. "We want to make sure that everyone has a chance to pursue their education and reach their full potential."

May God Bless & Say America

May God Bless America

By Lesley Warner

A nation of immigrants, America is a melting pot where cultures and traditions mix to create a unique identity. The words "May God Bless America" hold special meaning for many people, as they reflect a sense of gratitude and hope.

"May God Bless America" is a song that has been sung for generations, and it continues to be a symbol of national pride and unity. As we celebrate Independence Day, let us remember the values that have made America great, and strive to build a better future for our country.

View: Open Admissions

The open admissions policy is a big step forward for students who may have been left out of the traditional high school system. It's important to recognize the value of diverse backgrounds and perspectives, and to provide opportunities for all students to pursue their education.

"We want to make sure that every student has a chance to succeed," Brody said. "This policy is a way to level the playing field and give everyone a chance to reach their full potential."
Bio-Medifax ...

The methods of Georges de Hevesy have come to a rather unexpected conclusion regarding the possibility of using radioactive substances as a means of detecting and identifying microorganisms. The results of his work, published in the Journal of the American Chemical Society, suggest that radioactive elements can be used to mark the presence of microorganisms in a way that is not only more accurate than conventional methods, but also more sensitive.

In his experiments, de Hevesy exposed various types of bacteria to different concentrations of radioactive elements and then analyzed the resulting samples. He found that the amount of radioactivity present in each sample correlated directly with the number of bacteria present. This means that by counting the amount of radioactivity in a sample, scientists could determine the number of microorganisms present without having to resort to more traditional methods, such as staining and counting.

De Hevesy's work has important implications for the field of microbiology, as it could potentially revolutionize the way researchers detect and identify microorganisms. It also has potential applications in other fields, such as biotechnology and medicine, where the ability to accurately and sensitively detect microorganisms is crucial.

**PLACES TO EAT**

The 25 places to eat in the Word List on this page are all hidden in the diagram on the opposite page. Can you find them all? The words read forward, downward, upward, or diagonally, but they are always written in a straight line and never skip letters. We have started you off on GRILL. It's a good idea to start off the diagram on the page with GRILL. If you find a word more than once in the diagram, circle it only once. Letters may be used more than once, and the words often overlap. You will not, however, use all the letters in the diagram. The first three winners will receive $5 each.

The 81st Blow!

"You cannot undo the past but you can choose what to do next," said Elie Wiesel.

Thirty years ago, history most likely would have been written quite differently. Had not the armies of the Allied Powers entered Europe on D-Day, and not the armies of Liberation entered the continent in the following summer, the history of the modern world would have been written in a different way.

To mark the 50th anniversary of the end of World War II, the Citizens Committee of the American Jewish Historical Society and the Israel Information Office sponsored a symposium on "The June 6, 1944, D-Day Invasion: The Jewish Perspective." A special Academy was held the morning of June 5, 1974, at the Plaza Hotel in New York City. It was attended by a large number of historians, politicians, and journalists.

The first thing to be said about the invasion of Normandy was that it was a turning point in the war. The success of the invasion was due to the fact that the Allied forces were able to keep the German Army off balance for a long time. The invasion also marked the beginning of the end of the war in Europe.

The invasion of Normandy was a turning point in the war because it was the first time that the Allies were able to land on the continent of Europe. The success of the invasion was due to the fact that the Allied forces were able to keep the German Army off balance for a long time. The invasion also marked the beginning of the end of the war in Europe.

In the book "The History of the Jews," the author wrote that the invasion of Normandy was a turning point in the war because it was the first time that the Allies were able to land on the continent of Europe. The success of the invasion was due to the fact that the Allied forces were able to keep the German Army off balance for a long time. The invasion also marked the beginning of the end of the war in Europe.

New Stereo Releases.

By Larry Warshawski

As promised, in a column of the kind by the Rolling Stones, music company executives are sure to take a hard look at the Beatles and the Stones. A column that is sure to bring up the Beatles and the Stones.

"We Are Not Alone" by the Children of God, on RCA, is a bit of a surprise. The band's previous album, "The Sound of Music," was a bit more experimental, with a more psychedelic sound. This album, however, is a bit more pop-oriented and features more traditional rock instruments.

"The Rolling Stones" by the Rolling Stones, on Decca, is a bit more experimental. The band's previous album, "Beggars Banquet," was a bit more pop-oriented and features more traditional rock instruments.

"The Who" by the Who, on Capitol, is a bit more experimental. The band's previous album, "Who's Next," was a bit more pop-oriented and features more traditional rock instruments.

"The Doors" by the Doors, on Reprise, is a bit more experimental. The band's previous album, "Waiting for the Sun," was a bit more pop-oriented and features more traditional rock instruments.

"Janis Joplin" by Janis Joplin, on Columbia, is a bit more experimental. The band's previous album, "I Got Dem Ol' Kozmic Blues Again Mama!" was a bit more pop-oriented and features more traditional rock instruments.

"The Byrds" by the Byrds, on Capitol, is a bit more experimental. The band's previous album, "Sweetheart of the Rodeo," was a bit more pop-oriented and features more traditional rock instruments.

"The Beach Boys" by the Beach Boys, on Capitol, is a bit more experimental. The band's previous album, "Pet Sounds," was a bit more pop-oriented and features more traditional rock instruments.

"The Grateful Dead" by the Grateful Dead, on Warner Bros., is a bit more experimental. The band's previous album, "Aoxomoxoa," was a bit more pop-oriented and features more traditional rock instruments.

"The Who" by the Who, on Polydor, is a bit more experimental. The band's previous album, "Who Are You," was a bit more pop-oriented and features more traditional rock instruments.

"The Rolling Stones" by the Rolling Stones, on Decca, is a bit more experimental. The band's previous album, "Let's Spend the Night Together," was a bit more pop-oriented and features more traditional rock instruments.

"The Doors" by the Doors, on Reprise, is a bit more experimental. The band's previous album, "Waiting for the Sun," was a bit more pop-oriented and features more traditional rock instruments.

"Janis Joplin" by Janis Joplin, on Columbia, is a bit more experimental. The band's previous album, "I Got Dem Ol' Kozmic Blues Again Mama!" was a bit more pop-oriented and features more traditional rock instruments.

"The Byrds" by the Byrds, on Capitol, is a bit more experimental. The band's previous album, "Sweetheart of the Rodeo," was a bit more pop-oriented and features more traditional rock instruments.
