By CAROL CAMPBELL

Congratulations to Executive Vice-President, Dr. Bernard Mintz, on his new appointment as Acting President to start on November 8. Dr. Mintz's plans are for an anticipated nine months in office. "To maintain the second-to-none standards of Baruch College," was his answer. "Baruch College has fared better through the fiscal crises than other universities of CUNY. We have kept with our reduced enrollment and have had limited administrative cutbacks, mostly in part-time personnel. Dr. Mintz has been with the College since 1939, working part-time with evening registration, till 1940, as a full-time administrator. He has workeded his way from Assistant Business Manager of City College, to Vice-Chancellor for Administration, and now on to Acting President of Baruch. With a M.A. degree from Columbia University and a Doctorate degree from the Graduate School of Education, Columbia University, Dr. Mintz has helped bring about a major labor contract on Collective Bargaining between faculty and administration in 1968.

Baruch College, Dr. Mintz has been with us since 1972 and has helped bring about recognition of Baruch to the California legislature. There has been talk about establishing a campus, but because of the fiscal crisis this has been postponed. There can be no major improvements in the college now, which means we will have to wait for any further faculty, degree, core, and various programs are excellent, but the physical aspects are not the greatest. For example, our cleaning services have been but to the minimum, but he feels that student help will alleviate this problem. A recent CBS report stated, 'There has been a $2 million dollar deficit against anticipated funds,' and as far as tuition, 'I anticipate no change in tuition.' Also asked about the financial status of Baruch is that "it would be an administrative impossibility."

We have kept withing our resources. We have been the best of all other universities of CUNY. mintz has been with us since 1972 and has helped bring about recognition of Baruch to the California legislature. By JIM HEDGES and DAN LEWIS

Nigel Young, a private police association, has made the initial FOIA request. "This admission was not made "For an organization that is supposed to be about legal and criminal matters," Young stated, "INTERPOL is suddenly a raw nerve for the CIA." For the 11 documents involved in the disclosure, the effects will be harmful to national security. INTERPOL'S activity in those states. "I anticipate no change in tuition." Also asked about the financial status of Baruch is that "it would be an administrative impossibility."

In an affidavit attached to Briggs affidavit. The 11 documents span a time period from November 1971 to January 1973, which coincides with when the "plumbers" were active. The NCLE made its initial FOIA request on March 10, 1975, as part of its investigation of INTERPOL which has already prompted four Congressional probes. NCLE officials have testified before Senate and House Subcommittees on their findings and "have only begun," according to Briggs.

The California legislature will be holding two days of hearings next month into INTERPOL activities. A bill is currently pending in the California and Florida legislatures to prohibit INTERPOL activity in those states. NCLE officials have stated that the FBI "has not colluded with INTERPOL in any way," and that there is nothing in INTERPOL's relationship with the FBI that would be harmful to national security. The section replaced by Stotter also defies a section dealing with "documents disclosing CIA intelligence sources and methods that admits the 11 documents are classified top secret, secret or confidential."

In an affidavit attached to Stotter's original arguments, Dr. Stotter admitted that the material identifies CIA personnel and "pertains to foreign intelligence and disclosure could disrupt foreign relations."

**Letters to the Editor**

**To the Editor:**

Upon reading the article in The TICKER about the budget, I was appalled. It appears that a great deal of the money derived for Student Activities is used for student government. I emphasize the need for the Student Government to justify to us its allocation of funds to the extent of these activities. I would like to say a few words about the budget, and perhaps a few words for the position for which I thought.

The reason was, quite simply, that I wanted to find out about getting anything out of these activities, and I saw that there would be something of interest to me. I was interested in the fact that a person would be interested in as much detail as possible of what we were doing. People must have voice in the courses they are taking, especially if they are sponsored by the Student Activities department. People are not aware of the courses that the Student Activities department is taking.

I would like to ask the people who are interested in this matter, to think about the reason for the course. People are not aware of the courses that the Student Activities department is taking.

Barbara T. Tann

Our Champions

By FRANK ARD
We have few athletic endeavors, to cheer about here at Baruch. But one of the teams that brings pride to our students is the Baruch Bowling team. Baruch is the defending champion of the New York Division of the Eastern Intercollegiate Bowling Congress. They also won the championship in 1973 and '74, with a second place finish in 1973. They finished second in the Eastern Regional Championship Tournament.

The team was led by John Katsaros and Dave Goldenberg who won the Eastern Regional Doubles Championship and finished third in the nation. Katsaros also finished fourth in the nation in the individual competition. Both had a season's average of 191. They were assisted by Co-Captain Bobby Clark, who had a 185 average, and by post-Captain Kevin Bohan and Stan Chu, who have graduated since last season. Last year's team racked up an impressive 119-21 record which defeated Pace who placed second.

Tryouts for the Bowling Team are held every September. They are open to both men and women. You must have at least a 170 average with a potential for 180. This year's team includes as starters Dave Goldenberg, Co-Captain Bobby Clark, Co-Captain Bob Short, and newcomers Bob McNally and Roy Garcea. Coach Howard Engel says that "Both McNally and Garcea have 190 potential. Other members of the team include Joe Serto, Joe Rocco, John Mascetti, and Al Silvaghi."

This season the team is in third place after only a few weeks of bowling, and another championship is quite a possibility.

If you want to root for our heroes, the games are played on Sunday afternoon between 2 and 5 p.m. at Bowl-Mar Lanes, University Place between 11th and 12th Streets.

We will keep you updated as the season progresses.

The Sesame Street Theory

By LINDA PACHECO
Anyone who has met me at least once knows that I am a freak for Monty Python's Flying Circus.

In light of that fact, I have begun to study the "Sesame Street Theory," so-called for the famed show by which children learn by recognizing various items from classes you may be taking. The best example is a little song that a fellow-freak and I call "Bruce's Song." It is a put-down of several revered philosophers such as Kant, Mill, Aristotle, Socrates, Heidegger, Hume and Wittgenstein, claiming that they were, in essence, alcoholics.

Another skit, entitled "World Forum," involves a game show, with Marx, Che Guevara, and Mao Tse Tung as contestants. The questions center on politics, revealing several facts on Socialism. While on the topic of history, there is a skit entitled "The American Inquisition." True, it is not very informative, but the mere mention of a Spanish Inquisition brings a giggle to my lips.

The entire movie, "Monty Python, And The Holy Grail," is checkful of intelligent, although usually subtle, facts. Such is the case of one "peasant" who supposedly lives on a collective, and proceeds to explain the basics of Socialism. These are only a few of the more obvious examples. But, having recognized at least the name of the person and/or event from a more pleasant and relaxing situation than the classroom, it is easier to learn about it. You have more incentive. You want to know what the hell those lunatics are talking about.

This is not to say that you need not attend classes or do the required reading because "Python knows it all," but perhaps you can study some items with more enthusiasm.

Try it. You have nothing to lose but a bit of sanity. Happy Studying!
