Jewish Clubs Merge

By William Pesoch Jr.

Four campus Jewish clubs are currently charged with Day Session Student Government. These clubs are consolidating to form one collective Jewish association tentatively called "Jewish Society." The Jewish Student Federation, the Jewish Club, and the Yiddish Language Club are currently finding it difficult to continue. The merger of these clubs is a more generic name for what they call an "umbrella" Jewish organization.

"We saw that the different clubs were basically aiming at the same people," says Aviva Schecter, co-president and upper senior. Schecter also says that the Jewish Society is a more generic name for what she calls an "umbrella" Jewish organization.

Baruch College's Jewish Student Society is working on consolidating its groups to form a larger parent club. "The merger of these clubs is a more generic name for what they call an "umbrella" Jewish organization."

Gronski Replaces Lee as Council Chair

By Rafael Olmedo

DSSG Council Chairman Adam Gronski replaced Lee as council chairman. He said that the merger of the SSG is a more generic name for what they call an "umbrella" Jewish organization.

"We saw that the different clubs were basically aiming at the same people," says Aviva Schecter, co-president and upper senior. Schecter also says that the Jewish Society is a more generic name for what she calls an "umbrella" Jewish organization.

Gronski has been working on consolidating the SSG's governing bodies to form a larger parent club. "The merger of these clubs is a more generic name for what they call an "umbrella" Jewish organization."

DSSG Mobilizes for CUNY Day Rally

By Rafael Olmeda

The Day Session Student Government is hoping that forecasts for rain on March 14 don't diminish the expected turnout for a planned massive protest rally. The rally, which is scheduled to begin in front of 17 Lexington Ave. at 10 a.m. Thursday, will move from 23rd St. to 59th St. and Columbus Circle, where Baruch students will meet with students from most other campuses of the City University of New York. "Rain and cold weather put together would mean real problems, in terms of turnout," says Wilson Shum, president of the DSSG.

According to Shum, the rally date was proposed by Baruch students at the Legislative- Conference of the University Student Senate late last month. "We really had to push for that date. This rally is with the cooperation of CUNY, but for the most part Chiton (Thornhill) has been the contact person."

Thornhill, a member of Baruch's student council, says, "I see my role as being voice, not only for Baruch but also for CUNY. He calls the protest songs, which of he wrote, as rallying points for students. "I see myself as a motivator."

Board of Trustees Votes To Raise Admission Standards

By Hilary Coulton

The initiative to improve the high school preparation of students entering the City University of New York as announced by the Board of Trustees in January is unlikely to affect Baruch's enrollment, says John Fisher, director of undergraduate admissions.

According to the spring issue of City University News, published by CUNY's office of University Relations, the initiative was proposed by board of trustees' Committee on Long Range Planning and the Chancellor's Advisory Committee on School System Organization. According to Fisher, the initiative encourages high school students to pursue a more rigorous concentration of subjects before entering college. Currently only about 14 percent of New York City's high school graduates earn a regents diploma, which represents the completion of a rigorous academic program.

The initiative should not affect CUNY's open admissions policy, according to Reynolds. Under the current Baruch admissions policy students applying need a combined Scholastic Aptitude Test score of 900, a class rank of 72nd percentile or an 85 percent high school average in academic subjects. This average is the highest in CUNY.

Fisher explains that the reason for Baruch's 83 percent high school average qualification is to ensure that students coming in have a good chance of succeeding. It was found that students with a lower rating had a very high rate of failure. "We wanted to raise the criteria to make sure the students coming in were going to do well," he said.

Another reason for the high criteria is to alleviate the overcrowding at Baruch College. This Fisher states must be taken in the context that, if students don't come to Baruch as freshmen it does not mean that they cannot come to Baruch. But they will first have to go to the alternative route of community colleges that are "campus feeders with good developmental programs."

The initiative will only change the requirement courses on which the average is based and not the structure from which the numbers are derived," said Fisher.

Jean Lamont, chairman of the University Student Senate, is opposed to the idea of college preparation improvement. "From the moment the chancellor proposed it, I have been against, primarily because those who will bear the brunt of it are black and Latino people," he says.

According to the Chancellor's Advisory Committee the new program is expected to be phased in over several years.

Martinez Discusses Tuition at Hispanic Unity Meeting

By Massimo Salerno

On Thursday March 7, Dr. Robert Martinez, chairman of the Black and Latino Studies department at Baruch College, spoke on the need for Hispanic unity during the City University of New York's budget crunch and the need to organize in order to further the movement.

The event was organized by the Hispanic Society, Latino American Student Association, Puerto Rican Student Association, and Puerto Rican Youth. Students from these groups, as well as others, attended the meeting in the Oak Lounge of the Student Center.

Martinez's message focused on the need for Hispanic unity not only in times of crisis but always. "Many students are victimized by the "subway "college disease," said Martinez, referring to the fact that many students travel from home to school and do nothing in between.

The proposed CUNY budget cuts will have a significant impact on students here and

their ability to afford school, said Martinez. If the budget cuts go through, Baruch will lose between two and two-and-a-half million dollars in funding.

The budget cuts will have a significant impact on students here and

university. The CUNY budget cuts will have a significant impact on students here and

university. The CUNY budget cuts will have a significant impact on students here and

**Jewish Clubs Merge**

Continued from First Page

The proposal of consolidation initially was not enthusiastically received by the members of all clubs, but they eventually saw that it was a necessary move to bolster the budgets of the clubs and improve the viability of the Student Jewish Council. "The suggestion of the Monday meeting was met with a reaction among the students involved in the Jewish Council," says Schechter. "But the majority of students believe that the consolidation of the various clubs would be a beneficial move for the Jewish students of Hunter College.

Also, the new board members recognized the potential of the Student Jewish Council to offer more services and activities. "We hope to bring more programming to the Jewish students of Hunter College," says Schechter. "We want to create a sense of community and encourage intergroup relations.

In the future, the Jewish Society plans to reach out to more students. One way they plan to achieve this is by putting together a newsletter that will be distributed to students. The newsletter will feature articles about Jewish life events and society happenings. Additionally, the Jewish Society plans to reach out to other students including non-Jewish ones," says Schechter.

Now that the consolidation process is winding down, the Jewish Students and all members have to be a traditional liaison between Hunter College and the Jewish community. "The Student Jewish Council has extended an invitation to all Jewish students and faculty members to participate in the consolidation process," says Schechter.

Shum also hopes that this protest, which is under the aegis of the Student Jewish Council, will attract a large crowd. "The real purpose of our rally was to rally people to sign up and help in the event of student participation. It's not possible to have a good student protest if people stand out, it could have been a much better rally than what we had," Shum said.

**Baruch College Radio Station Installs Carrier Current System**

Continued from First Page

The project began three years ago, when Fernando Cadena, treasurer of the Jewish Student Society, and James, member of the Jewish Student Society, approached the administration about the possibility of installing a carrier current system on campus. "We wanted to have a system that would allow students to listen to local and national programming, while also providing an educational opportunity," said Cadena.

After much discussion and planning, the Jewish Student Society was able to secure funding from the CUNY Day of Education grant and the Student Union. Shum also hopes that this project will provide a valuable learning experience for students.

**DSSG’s Rules of Disorder**

Adem Gronski became chairman of council of the Day Student Student Government after James Lee’s sudden resignation on Feb. 28. While Gronski is a dedicated member of government who has shown his leadership ability as chair of the club chartering committee, his rapid rise casts serious doubt on council’s knowledge of the DSSG constitution.

There is no question that the move clearly violates Article VIII, Section 4, which explicitly states that council vacancies are to be filled by “the candidate with the highest total vote count from the constituency, until,” and that if there be none, “after two weeks of public notice, the council will receive open nominations,” with an election to follow. This procedure was not carried out.

So it was understood that the next person in line for the chair did not want the position, an election in accordance with the rule was in order. Government members claim that the urgency of current times made council desire to expedite the resolution of unexpected scenarios.

This, they say, is why Gronski was selected so quickly. We don’t buy it.

The government’s explanation has two gaping holes. First, it assumes that everyone involved was aware of how the constitution dealt with vacancies. Yet neither Lee nor Gronski knew, and although there is no evidence that the executive council did not know the rule, there is also no record of any objection to council’s violation of procedure. If they did know, they weren’t telling.

Second, the explanation makes it seem as though council made a conscious decision to override constitutional procedure because of the emergency situation. Clearly, this was not the case. There was no debate. There was no discussion. There was no vote. There is nothing to indicate that council was aware of their action. The DSSG must learn that their constitution is there for a reason. To violate it on the grounds that they just don’t know what it says is completely unforgivable. To make excuses is worse.

**LETTERS**

**A Presidential Call For Action**

To the Editor:

Now, all of you are fully aware of the proposed cuts in the Governor’s Executive Budget. If these impending cuts are implemented, the university’s academic curriculum will be directly impacted. We do not know all we will lose in that augmentation and a cut in financial aid will affect drastically the aspirations and achievements of all our students. For this reason, I urge you to participate in the letter-writing campaign consisting of sending signed letters and cards to your respective congressman. Let them know that these proposed cuts are unworkable and that future generations toward graduation will be impeded if not eliminated. The governor’s plans also demand loses and decreases that we cannot tolerate.

Not only should you write to your elected officials, but you should also write to the DSSG. We need you. If you need additional forms to write, you may contact the Office of Student Development, and volunteer to sign up your own letter as well.

Let us do this constructive way to make our voices heard. Let us more communicate with our legislative representatives, and articulate our very real educational concerns. If we want to keep our current achievements, we have to reverse the current executive proposals.

-Jane S. Riepe

**Time To Clean House**

To the Editor:

Why should student activity fees be misappropriated? Why should the student center be reserved for first-year student use? When we pay our dollars for the use of the student center and outside bodies participate in center events.

The DSSG is attempting to reverse some of the political and administrative and managerial sector of the student center. Some try to rationalize the problem away by saying “Baruch has the lowest student activity fee among all CUNY schools.” This is not true. That’s just another ploy to squeeze more money from the students and Baruch united will never be defeated.

This is just a little bit of what corruption exists in the so-called govern-

**The Revolutionary Generation**

By Newton Bruncane

There is a war going on in universities across the country. The body and the legislative apparatus have seen a change in which the students are fighting for in order to achieve some semblance of control over their lives. One school that is up for the fight is Baruch College.

The students at Baruch are fighting for a chance to stand up for what is properly known as academic freedom. This freedom up for ourselves and our position to the world. We are the Children of the DSSG. We are the children of the future. We are the ones who hold the key to the future. We are the ones who will make the difference. We will make the difference. We are the ones who will make the difference.

We are the Children of the DSSG. We are the ones who hold the key to the future. We are the ones who will make the difference. We will make the difference. We are the ones who will make the difference.

Voodoo Inspires Modern Music

By Selphie Phillips

When many people think of the word “voodoo,” words like Blue and Blues, may not be the first thoughts that come to mind. However, the art of voodoo has been around for centuries and has left its mark on the world of music, particularly in the genre of modern music.

The influence of African dance and religious rituals has been evident in modern music. The African influence can be seen in the way that traditional African music and dance reflects the male as the dominant figure and the female as the subservient figure. This is evident in the way that traditional African music and dance are structured, with the male figure taking the lead while the female figure follows.

Music and dance go hand in hand, and they are often intertwined in the African culture. The music is often accompanied by dance, and the dance is often accompanied by music. This is evident in the way that traditional African music and dance are performed, with the music and dance often being performed in unison.

Students Get New Mom

By Richard D. Roberts

She may not be on the Baruch faculty, but she's certainly a member of the Baruch family. She's in every class, in every dormitory, and every office building. She's the one who answers all your questions, no matter how silly or trivial. She's the one who makes sure that you never miss a class, and that you always have the right supplies. She's the one who knows what's going on, and can always help you out. She's the one who's always there, no matter what.

But many just think of her as an assistant, or a secretary. But she's more than that. She's a mother, a mentor, a friend. She's the one who's always there, no matter what.

She's the one who's always there, no matter what. She's the one who's always there, no matter what. She's the one who's always there, no matter what. She's the one who's always there, no matter what.
I don't give test. There is no midterm or final.
The Attack is back. This time around we have three reviews (instead of two), and also three previews of Game Pak titles that will hit the shelves in the near future. The reviews are informative, and the previews are fascinating, so if you’re interested in what’s already available.

The first game, Mario, is Nintendo’s own Dr. Mario. Yes, your favorite Italian plumber is back, and he’s being helped by his doctor brother, Dr. Mario. Perhaps he got his bachelor’s degree in between his battles with Donkey Kong, and then went to medical school while adventuring in the Mushroom Kingdom. Nonetheless, he’s back, and he’s got his work cut out for him. In this edition of Mario, he’s faced with tough enemies like the brothers called Wrecking Crew. But the people knew that, like the first game, this was just the beginning of a series of games that would continue to grow. So, they made it a smaller, fun game so that people could enjoy it. The result is a game that everyone is going to enjoy, especially those few who are unfamiliar with Mario. Personally, I just can’t wait for the Super Mario Bros. 4 to be released. Dr. Mario by Nintendo gets a C++.

With Heavy Barrel, Data East USA has another NES version of an arcade hit. Released about one year ago, this is a six-stage, complete with various weapons and challenges. But there’s the heavy barrel gun. Parts of it are scattered around the different areas. It’s a four-legged beast. Of course, you need to find the keys to these lockers, and all of the while you’re also shooting and bashing terrorists to destroy their armaments, including tanks, planes, helicopters and guns. There’s a moderately challenging stage to keep you interested.

The first stage, the surface defenses, is pretty easy and not very important, as you’ll learn a lot about game mechanics. Shoot all enemy soldiers, especially the red ones, and hold the keys. Unlike the first game, you have no super grenades, the most powerful weapon strained by the terrorist, skip the second boss and get the third, which contains the spray paint gun. Continue to pick up keys to have a four key maximum carrying capacity? With this spray gun. Shoot the soldier on, beating him as much as you can. Avoid the touch and flash the corresponding letter. This is helpful in the most dangerous points. The game is easier than most, and there’s the Heavy Barrel gun.

3. The second game, Dr. Mario, is a prime example of the same color. Shoot all enemy soldiers, especially those few who are unfamiliar with Mario. Personally, I just can’t wait for the Super Mario Bros. 4 to be released. Dr. Mario by Nintendo gets a C++.

On Friday March 15, Warner Brothers Pictures is set to release the dramatic recreation of the Congressional Un-American hearings that accused some of the greatest creative minds of Hollywood of subversion.

"Grilly But Without" is the story of David Merrill, an innocent housewife who was hounded by the HUAC. This is not her story, but a story of those who were hounded by the HUAC.

The story is set in the 1950s, when the House Un-American Activities Committee (HUAC) was in its prime. The committee was known for its aggressive tactics, and the hearings were aimed at anyone who was suspected of being a communist or communist sympathizer.

The committee was led by J. Edgar Hoover, who was known for his brutal tactics. The hearings were held in a room in the State Department, and the witnesses were forced to testify under oath.

The story of David Merrill is told through the lens of her husband, who had his name cleared by the committee. But the story is not just about him; it is about the impact that the hearings had on all of the witnesses.

The film is directed by Irwin Winkler, who has produced such films as "The Grifters," "Goodfellas," and "The Right Stuff." He is known for his ability to bring out the best in his actors, and he has done so again with this film.

"Grilly But Without" is a compelling story, and it is one that should be told. The committee was a force of evil, and they should not be allowed to go unrecognized.

Merrill is accused of communist activities, but all he has to do is wait. He can have more than enough of those films. "The Grifters," "Goodfellas," and "The Right Stuff" are all movies that he has seen, and he is sure that he is going to get away with it.

But the committee is not going to let him get away with it. They are going to make sure that he is brought to justice.

The film is a reminder of the power of the committee, and it is a story that should be told. It is a story of fear, of honesty, and of the power of the committee.

It is a story that should not be forgotten.

If you thought that finding a color Macintosh system you could afford was just a dream, then the new affordable Macintosh LC is a dream come true.

The Macintosh LC is rich in color. Unlike many computers that can display only 16 colors at once, the Macintosh LC expands your palette to 256 colors. It also comes with a microphone and new sound-input technology that lets you personalize your work by adding voice or other sounds.

The Macintosh LC is easy to master. And it expands your palette to 256 colors. It's better than a dream—it's a Macintosh.

The Macintosh LC is a dream come true.

BARUCH'S NOBEL PROFESSOR
Profile of a Gentleman and a Scholar

By Edward Amstutz

Amathes, the great ancient Greek philosopher, is said to have been so excited about his discovery of the role of sugar in diabetes that he ran outside and cried "Eureka!"

Baruch Professor Harry M. Markowitz was just as excited in 1952 when he came up with a new theory as a result of his work on the field of financial economics. "I feel very uncomfortable giving a good thing to have a free flow of information," he said.

"I know that wasn't right because it involved a new field," Markowitz said, "but I felt at the time it was right because it was a new field, and I felt that the field was important and that it would have a significant impact on society." He was awarded the Nobel Prize in Economics in 1990 for his work in portfolio theory.

Markowitz was born in 1927 in New York City and grew up in a family that was involved in the textile industry. He received his undergraduate degree from the University of Chicago in 1948 and his Ph.D. from the same school in 1952. He then joined the faculty of Baruch College, where he has served for over 30 years.

As a professor of finance, Markowitz is known for his work on portfolio theory, which he developed in the 1950s. His work has had a significant impact on the field of finance and has been applied in the real world of investment management.

Markowitz was a pioneer in the field of financial economics, and his work has been influential in the development of modern portfolio theory. His contributions to the field have been widely recognized, and he has received numerous awards and honors for his work.

Baruch College has fulfilled its promise to students, past and present, to be a place where students can learn and grow. This is a place where they can be maximized by putting in the work.

The prestigious $100,000 Trevor Perspectives Award, which is sponsored by Trevor Perspectives, will be shared with two other recipients in the same field. Martin Miller of the University of Chicago and William Sharpe of Stanford University. Markowitz was considered "The Father of Modern Finance." He has been a key figure in the field of portfolio theory and investment management for over 50 years.

Baruch is proud to honor Harry M. Markowitz with the Trevor Perspectives Award. This award is given to those who have made significant contributions to the field of finance and investment management. The awardees are selected based on their achievements and impact on the field.

Baruch College has a long history of excellence in the field of finance. The college has produced many successful professionals who have gone on to make significant contributions to the field. Baruch College is proud to have been a part of Markowitz's success and looks forward to continuing to support and grow the field of finance.

"I feel very uncomfortable giving a good thing to have a free flow of information," Markowitz said. "I don't want to take anything away from the students. I want them to have a chance to learn and grow."

Baruch Bowlers Finish Second To Cooper Union

Joe Byrnes

The Baruch Bowlers finished second in the 1990-91 season, their best finish in years.

By Joseph Spera

The 1990-91 Baruch Bowlers bowling team is a solid one, and they have shown it off this season. The Bowlers have finished second in the conference for two consecutive years.

The team is composed of seven bowlers, four of whom are sophomores and three of whom are freshmen. The team is led by seniors Yaneo and Yip, who have been with the team for two years.

The team has won four out of the six games they have played this season. Their only losses were to Cooper Union, who finished first in the conference, and to City College, who finished third.

The team has shown improvement in their season, as they have increased their average bowling scores. The team's average bowling score is 174, up from 167 last season.

The team is currently ranked 15th in the nation, and is expected to move up in the rankings in the upcoming season. The team is looking forward to next season, when they hope to improve on their second place finish.

BEWARE THE 14th OF MARCH
CUNY WIDE RALLY PROTESTING BUDGET CUTS AND TUITION INCREASES

On Thursday March 14th, at 10:00 a.m. Baruch students will assemble at 23rd and Lexington Avenue, as part of a massive CUNY wide rally. Under the guidance of the Day Session Student Government, these students will walk to Columbus Circle at 59th and 8th Ave., where they will meet with thousands of fellow students from all CUNY colleges.

The idea of this rally was hatched by the Baruch contingent at the recently concluded CUNY Student conference in Albany. It is our intention to show Gov. Cuomo, in no uncertain terms, how important our education is to us. The decision to cut funds for education and unconscionably raise tuition is unacceptable to the thousands of young men and women who will be forced into the job market, without marketable skills or education.

On January 21, 1988, Gov. Cuomo was quoted as saying: "My objective is to freeze tuition for as long as possible...It is my desire not to increase tuition for the remainder of my term...I think CUNY and SUNY should be free..." Unfortunately, this objective has fallen by the wayside as the Governor has sought to "My objective is to freeze tuition for as long as possible...It is my desire not to increase tuition for the remainder of my term...I think CUNY and SUNY should be free..."

address other problems. Along with the 32 members of the assembly and senate who attended CUNY for freeGov. Cuomo must be reminded that he should try harder to keep his promises.

We are hopeful that the weather will be kind to us, and that we will not be forced to postpone the rally. However, in the event that there is very bad weather we will reschedule this rally until Thursday 21st. This rally is so important as a signal, not only to Gov. Cuomo, but all the members of the legislature that we must make very certain that it is an unquestionable success.

Governor Cuomo is literally trying to take our blood, by restricting our chance for an education. We request that you wear red clothing as a symbol of his 'blood sucking' actions; education is our 'life blood' without it we have little chance of survival.

As students we are "building together for the future, building for the good of all", and to quote Wilson Shum, president DSSG; "by land, by sea, across the boroughs, all across CUNY" we will march to Columbus Circle on March 14th. WE STAND AS UNITED STUDENTS.

PRESIDENT BROWN SHOWS SUPPORT

At a meeting on Friday 08th with members of Student Government, Dr. Joyce Brown, president of Baruch College, agreed to ask professors and faculty to show understanding and support to those students who are attending the rally on the 14th of March. This request is contained in a letter sent to the teaching staff on Monday 11th.

This is by no means a guarantee for students to skip classes without permission, but, merely, an 'entree' for students seeking approval from their professors.

We implore you to come out to this important rally and support the efforts of your fellow students who are fighting for their futures.

"THEY TELL US NOT TO FUSS OR FIGHT BUT EDUCATION IS OUR RIGHT CUNY USED TO BE FOR FREE NOW THEY WANT TO RAISE OUR FEE"

DON'T LET CUNY BE PUNY
MARCH 14TH IS CUNY DAY

AT GOVERNOR CUOMO'S DOORSTEP

All students interested in attending a rally in Albany on Tuesday 19th, March, please contact Student Government. This will be a large gathering of CUNY students, legislators of the Black and Hispanic Caucus in Albany and other concerned citizens. Protestors will be rallying behind the issues of the cuts in education and social services.

CUNY students will be in attendance in force, therefore, those of you who cannot rally on Thursday, 14th, should come out on Tuesday 19th. Buses will leave Baruch around 6:30 a.m. on the 19th. en route to Albany, and will return on the same day. Contact your professor and seek permission. Unless you fight today you will be unable to breathe tomorrow; non-attendance at a class today paves the way for continuing classes tomorrow. Feel free to contact your student government for any further details or assistance.
