Peress Flunks Out of Presidency

By Polly Gwardyak

President Dan Peress will formally step down as the President of the Day Session Student Government (DSSG) during the council meeting this Thursday. Zeshan Hamid is set to succeed Ilan Peress as President of DSSG.

Peress failed to fulfill his minimum academic obligation as required by DSSG. His GPA fell below 2.5 during the Fall 1997 semester, the minimum required to hold any position in DSSG, making him ineligible to complete his term of office. Hamid, as Executive Vice President, is in line to succeed Peress.

"I want to make the transition as smooth as possible," said Hamid. "I'm here to serve DSSG. I want to take the responsibility given to me and do the best job I can."

Hamid, who is a senior in Marketing Management, served as acting President for a month last semester when Peress was out due to illness. This, he says, gave him

Exiting President Ilan Peress

a feel for the responsibilities involved. Also, as a former club president, Hamid says that he knows how the club leaders feel and hopes this will enable him to better work with them and respond to their needs.

One of his first responsibilities as President, he says, is to fill the now vacant seat of the vice presidency. He has not yet chosen the person, he says, but expects that by the next council meeting he will submit a nomination for the council's consideration.

Closing Open Admissions

By Chan-Joo Moon

Equal opportunity was never meant to be equal mediocrity but neither is a quality education meant to be social injustice. As City University of New York (CUNY) reviews its policy of Open Admissions and academic standards, a central issue is whether raising the standards will push out Black and Hispanic students from their share of the pie.

This issue has taken an urgency because of the need for a college degree in the modern economy. A report by the Rand Corporation shows that industrial jobs make up only 17 percent of the jobs available, having given way to service sector jobs which require the skills from a college degree. This has fueled the explosion in college enrollment - particularly of adults - driving the average age of the student body into the mid-twenties and placing tremendous financial strains on public colleges and universities.

The Rand Corp. report, titled "Breaking the Social Contract: The Fiscal Crisis in California Higher Education," described the current situation as a "time bomb ticking under California's social and economic foundation."

"Colleges are institutions of higher education. They are not high schools"

The Social Contract refers to the Morrill Act of 1862, which created land-grant colleges and guaranteed a higher education to all citizens who could benefit from it.

California's situation, which is reflective of the rest of the nation including CUNY, shows that for the last ten years, there has been insufficient funding for the state's public colleges and universities while they expect an additional 500,000 students to enter the system by the year 2005.

The high and rising costs of providing an education makes it impossible for the system to accommodate such a great number of students; it is forcing public colleges and universities to restructure themselves to be more efficient.

At CUNY, one of the measures the Board of Trustees is considering is reducing academic sprawl: streamlining the whole system so that majors are not duplicated among different campuses; Brooklyn College would focus on English, Baruch on Business and City College on Science and Engineering.

So far, these measures are not expected to be enough to make up for the financial shortfalls in the public
New Library Policy Limits Access to Outsiders

By Chan-jOG Moon

Access to the Newman Library has been closed to all non-CUNY persons as of December 13, 1993. The only exception is for those who need to use materials which are not available in the collection. In order to make study space for Baruch students who could not sit in the library, approximately half the library’s members have been forced out of seats and computer stations. The policy has been that all members who want to use the library must obtain a pass provided they offer a pass from a member of the Newman Library. This is to give priority to Baruch students while still maintaining access by the community.

"About all of the fifth floor and half of the fourth … were occupied on a regular basis by students from … NYU and the SUNY of Optometry."

He expressed concern to Provost Leo S. Cronholm, who immediately issued instructions to allow only persons with CUNY identification cards into the library.

Some of the students from other schools complained about the "disappointment."

One of the criticisms of this policy has been that all members of the public should be allowed access because Baruch reserves public funds.

"That's a mandate of the New York Public Library," said Downey. "Our funding is primarily directed towards serving the needs of our students."

He said that he has contacted the other institutions to explain the library's need for the restrictive policy and to point out the need for the non-CUNY schools to provide more study space for their students.

The library may be able to lend a limited amount of guest and visitor passes, according to Cronholm.

"We want to accommodate both Baruch students and the public in our library," she said.

130 Baruch students signed a petition to protest this situation.

"It didn't seem fair that Baruch students were using make-shift space while premium space was used by students from other colleges," said Downey.

By the end of the fourth floor, Baruch students could not sit in the library.

The library at first placed a limit on the number of guests and visitor passes in an effort to give priority to Baruch students while still maintaining access by the community. However, this system was bypassed by various methods, one of which was "to slip" a pass out for those who need to use materials which are not available in the collection.

"It's a matter of priority," he said. "We have money for our libraries, and we're not to use it with anybody.

"Whatever we decide to do, well find the money for it," he said.

The problems with a airability, however, go far beyond money, and have outstanding issues.

"This is a mandate of the New York Public Library," said Downey. "Our funding is primarily directed towards serving the needs of our students."

Don't Be A Chicken!

Blood Donors Save Lives.

A blood donor is good for people who go through windshields and red lights. For somebody with leukemia, for barefoot kids who aren't careful. For people having open-heart surgery. For cancer patients. For kids who fall out of trees. For people in the wrong place at the wrong time. For the very tired with malaria. For barefoot kids who aren't careful. For people undergoing kidney dialysis. For people who are burned. For cancer patients. For kids who fall out of trees. For people in the wrong place at the wrong time. "Our Spirit Soars: Reclamation Film Screening/Discussion to take place on Feb. 11, 17 Lex. Ave., Room 1303, 5:30pm."

In short for people who are in windshields and red lights. For somebody with leukemia, wrong place at the wrong time. For the very tired with malaria. For barefoot kids who aren't careful. For people undergoing kidney dialysis. For people who are burned. For cancer patients. For kids who fall out of trees. For people in the wrong place at the wrong time.

Asian Crisis Affects International Students

continued from front page

Asian financial crisis and that he has identified about 90 students for whom an exception has been made. Remedial courses may still be enrolled. The full impact of the crisis is still being felt. Remedial students are now preparing their tuition before the deadline in November and others have not been able to enroll. The limited course offerings are due to the economic situation, which has left many students unable to pay for courses. The demand for remedial courses has increased.

The number of Baruch students who study vis-a-vis from South Korea, Thailand and Indonesia have declined. The number of students who have been admitted but have not enrolled has also increased. Students from the IBS have been unable to pay for their courses and have been unable to pay for their tuition. Baruch has been unable to pay for its tuition. The students have been unable to pay for their courses.

NYU is working hard to help students who are enrolled. The students have been unable to pay for their courses. The students have been unable to pay for their courses. NYU has about 600 South Korean students. The students have been unable to pay for their courses.

Closing Open Admissions

continued from front page

Editor for the City Journal, students in remedial classes were allowed to register in regular classes because keeping them at a lower level would be "simplistic." This has resulted in regular courses becoming remedial courses rather than having the intended effect of remedial students completing remedial courses and regular courses.

With enrollment at public universities and costs rising, CUNY, located as the Free University in 1947, may become too expensive for the poor, along with other public higher education institutions in the nation.

Doubled with the rise in modest standards, many students who may have under different circumstances performed better academically may never even be a chance. Open Admissions, shown to have been an important step towards many minorities, may be closed.

"I started teaching in 1996," said Sandi Cooper, Chair of the University Faculty Senate. "Some of the family and students feel that NYU get money from remedial courses. Remedial courses, however, cost a lot of money during a time when students need to conserve in order to survive. "CUNY" has been among those of the lower 90% of the law school, according to Goldberg. He said the law school has been "particularly hard on students." The students are particular hard on students. The students are particular hard on students. The students are particular hard on students. The students are particular hard on students.

Remedial courses have also been tied to the "rushing" of other classes. An unmotivated student may "wake up and take off."
DSSG President Resigns: Does anyone care?

This editorial is not meant to put down the departing DSSG president, Ilan Peress, but rather to bring to light what DSSG has done since he was "incapacitated."

A whole lotta nuthin'.

Even with Mr. Peress there, the Day Session Student Government has accomplished nothing.

We, at The Ticker, cannot think of one productive thing that DSSG has done for the student population since taking office in July.

What they have done is receive a stipend, and just waste time in their offices.

DSSG is meant to serve the student population, but has not. Look forward to more of the same this semester.

Without strong leadership, DSSG has fizzled.

Where is David Kinzelberg when we need him?

**They could also continue to kidnap, their only way to maintain who they are.**

The end of the trade agreement, which was made by the African Americans who had been forced to engage in this trade, was an increasing quantity. This resulted in a better end of the trade agreement.

**Drugs & Alcohol: Tools of Oppression**

By Rory Dunn and Richard Austin

Though the modern history, especially after the rise of European settlers, many Indians have been forced to engage in the trade of alcohol and tobacco. This has resulted in the continued supply of these goods to the Native Americans, and the continued supply of alcohol to the Europeans, set 'out to conquer" tactics, made their task much easier than it would have been otherwise.

Drugs and alcohol were traded with the Native Americans, alcohol was used by the Europeans as a tool to conquer and exploit them. The authorities manufactured these decisions and protected their borders. The Europeans attempted to control, dominate, and exploit the Native Americans, especially after the highpoint of targeting the Black community, which benefited greatly from the period of decline, right-wing capitalist, and a rise in drug use among the poor. 

**Family and community structures**, to recover from slavery and post-slavery underdevelopment, were devastated and the people were left in a state of economic and social ruin.

**The correct price for the drugs**? The correct price for the drugs is not a question of supply and demand, but a question of control and manipulation. The authorities determine what the price of the drugs should be, and they use this as a tool to control and manipulate the people.

**Defense contractors have bled this country dry by trying to build a nuclear arsenal that is rotting away in America's heartland.**

By Edward Rodriguez

The war in Iraq is not just a war, but a war of economic and political exploitation. The government has spent billions of dollars on this war, and the people have not benefited from it. The war has resulted in the displacement of millions of people, and has caused economic and social ruination.

**The SOLUTIONS**

For those of you who are dismayed or depressed at my apocalyptic predictions, I have some hope for us. We must use our thoughts and feelings away from one of violence, exploitation, and inhumanity. We must work to create a society where the rich and the poor are treated equally. We must work to create a society where the rich and the poor are treated equally. We must work to create a society where the rich and the poor are treated equally.

**Sorry**

The best thing to hit New York City. The drugs were advertising by black and white teenagers. The New York police, with the help of the CIA, advertised heroin as a drug of choice for the rich and the poor.

**The crack epidemic.** The crack epidemic was a system of infiltration and concentration. It was a system of infiltration and concentration. It was a system of infiltration and concentration. It was a system of infiltration and concentration.

**The effects of drug overuse and overuse of drugs**

The effects of drug overuse and overuse of drugs are devastating. The effects of drug overuse and overuse of drugs are devastating. The effects of drug overuse and overuse of drugs are devastating.

**The cost of welfare.** The cost of welfare (AFDC) is 1% of the national budget or $15 billion. The cost of welfare (AFDC) is 1% of the national budget or $15 billion. The cost of welfare (AFDC) is 1% of the national budget or $15 billion.

**Speculation**

For those of you who are confused and frustrated by the news about DSSG, you should know that we have not been able to put together a clear and coherent understanding of the situation. The professor also pointed out that the fact that the government was somewhat repetitious due to $10 billion in welfare cuts was already known.

However, before he sent out his report to Dr. Traverzo, the students were able to look at the report from a third party that he would not have been able to look at. The students were able to look at the report from a third party that he would not have been able to look at. The students were able to look at the report from a third party that he would not have been able to look at.

While Traverzo was lucky to have a job, Ana Lopez was not. She replaced the professor and was able to look at the students' report for the first time.

**Contemporary Racism 7**

I have been lucky to have been able to look at the students' report for the first time. I have been able to look at the students' report for the first time. I have been able to look at the students' report for the first time.

Business And The Economy

1997 Business In Review

The year one thousand nine hundred ninety-seven was a year in which global stock markets took the titanic plunge on what was dubbed as "Bloody Monday". Mergers between the accounting firms of KPMG with Ernst & Young and Coopers & Lybrand and Price Waterhouse dissolved the once dominant Big Six accounting firms. The brokerage houses of Dean Witter and Morgan Stanley also merged to become the world's most powerful brokerage house. In other events, workers at Amtrak and UPS went on strike for better wages and compensation. In retailing news, Woolworth's chain of five-and-dime stores closed across the nation. Tiger Woods took the sports world by storm and revitalized the sport of golf while Marv Albert plead guilty to sodomy and was released by NBC. Here is a complete breakdown of the year in business for 1997.

1. After 20 years Star Wars was re-released and earned $36.2 at the box office over the weekend, making it Hollywood's largest opening ever.

2. Morgan Stanley Group Inc. and Dean Witter & Discovery Co. announced that they would merge forming a Wall Street goliath with a market capitalisation of over $20 billion. Morgan Stanley, primarily an investment bank, was expected to supply research to Dean Witter's army of over 8,500 brokers.

3. A federal judge demanded companies 'sending junk e-mail or "spam" to stop changing their on-line identities so that AOL could block it out.'

4. Economic advisers to President Clinton warned against putting part of the Security in the Stock market, saying "[it] raises concern about risk."

5. Several class action suits were filed against AOL by subscribers who were not able to access the Internet due to jamming by an overload of users. AOL agreed to spend $100 million to expand its network capacity and to add fewer new subscribers.

6. The SEC approved new rules on when trading could be halted. The "circuit breakers" could now halt the NYSE for 30 minutes if it fell 100 points, and for an hour if it lost 350 points.

7. Japan planned to call on the Group of Seven countries to halt the slide of the yen against the US dollar.

8. Several class action suits were filed against AOL by subscribers who were not able to access the Internet due to jamming by an overload of users. AOL agreed to spend $100 million to expand its network capacity and to add fewer new subscribers.

9. The Justice Department announced that they were ready to file an antitrust suit against Visa USA and MasterCard for not allowing member banks to issue American Express and Discover cards.

10. Federal regulators denied Ameritech Corp.'s application to offer long-distance service.

11. Economic advisers to President Clinton warned against putting part of the Security in the Stock market, saying "[it] raises concern about risk."

34 cated that banks were getting closer to the core of the country's financial system, with lending to more people in a tighter labor market, while agreeing to offer higher salaries.

35 A study by the Wall Street Journal found that TV networks were using a variety of tactics to mask the real costs of their business agreements.

36 Microsoft announced that they would seek to standardize the way that computer publishers created television-like channels.

37 A Federal Reserve study indi­

38 cated that banks were getting closer to the core of the country's financial system, with lending to more people in a tighter labor market, while agreeing to offer higher salaries.

39 A study by the Wall Street Journal found that TV networks were using a variety of tactics to mask the real costs of their business agreements.

40 After Trans World Airlines announced a tremendous loss, the Securities and Exchange Commission said it had placed an additional 15,000 passengers on 21 different routes for a total of 250,000 passengers in the first quarter of 1998.

41 Tyco announced it had planted a mine with ADT, limiting Tyco International.

42 Sony Computer and the Japa­

43 nese broadcaster Fuji Television Network Inc. said they would become partners in the Japanese TV networking company, headed by Rupert Murdoch.

43 Sony Computer and the Japa­

44 nese broadcaster Fuji Television Network Inc. said they would become partners in the Japanese TV networking company, headed by Rupert Murdoch.

45 Singapore released new 3G services in the Global Compulsory BS3 report, which prohibited such services without reliable evidence.

46 Claims by London International Inc., maker of Ramses condoms, that their products were "30% stronger than the leading brand" was refuted by the FTC, which prohibited such claims without reliable evidence.

47 Worldcom acquired Compuserve Corp. and 1,100 corporate cus­

48 tomers but transferred Compuserve's three million com­

49 mitments to AOL on a $1.2 billion deal. The move makes Compuserve a networking giant.

50 GM's Hughes Electronics Corp. announced a satellite-telecom­

51 munications contract with Abu Dhabi-based Thuraya Satellite Telecommunications Co. The deal was expected to be valued at an estimated $900 million.

51 The City Council of Chicago, Illinois had approved a ban on bil­

52 boards advertising smoking.

52 Delta Airlines sought to expand their services overseas with a nonstop flight between Tokyo and Atlanta. The company also sought rights to additional ser­

53 vices between Portland, Ore. and Japan.

54 Cooper's and Lybrand announced plans to merge with Price Waterhouse, creating the world's largest accounting firm and dis­

55 solving the so-called Big Six ac­

56 counting giants. The merger dropped current accounting giant Arthur Andersen, worldwide into second place with annual revenues of $9.9 billion.

56 Wheeling-P(buffalo-Citic Co. agreed to buy American Radio Systems Corp. for $1.8 billion, plus the ac­

57 sumption of $11 billion in debt.

58 Fila Holding Plc signed Detroit Pistons' star Grant Hill to an esti­

59 mated $80 million over seven years, the richest deal in basketball.

59 NBC terminated its relationship with Mary Alice. After Alice pleaded guilty to charges of ad­

60 sabatory.

61 General Mills Inc. planned to close some of its smallest cereal fac­

62 tories, eliminating 350 jobs in the process.

HELP WANTED

By Richard Brody

The Baruch College Alumni Mentoring Program is flourishing with approximately 100 alumni and undergraduate participants. Twenty-five mentors and mentees met in a lively "opening" session on the evening of November Sixth to exchange experiences and share ideas about what a mentoring relationship ought to include. All participants reported that their experiences in the program were positive and that they are pleased with the way the program is developing.

The evening was truly extraordinary and rare in that it involved an intense productive cross generational dialogue between Baruch alumni and undergraduates about what knowledge graduates should have when moving from school to career. Going beyond the notion of the matching conversation about business ought to be the principal concern of a mentoring relationship, the discussion moved to define categories of knowledge.

Graduates, it is agreed, are usually well versed in what was termed, Hard Knowledge, the nuts and bolts of business theory and operation learned in school. On the other hand, familiarity and ease with what was termed, Soft Knowledge, those skills involving personal presentation, is usually lacking in most of us and in an area which we might explore. Mentors and mentees were unanimous in their opinion that interviewers usually do not ask technical questions when screening candidates. Instead, they look for these soft skills. To help their mentees, mentors might share their experiences and ideas about dress codes, resume preparation, interviewing skills and business etiquette while providing feedback about their present state of career development to their mentees.

One group observed that mentors can share their ideas about the steps, courses taken, internships and part-time jobs, for example, that should be undertaken along a career path. Unlike college personnel, mentors are able to share day-to-day experience with their mentees giving them guidance and suggest strategies, support areas in which the mentor might work to improve their employment profile, offer ideas about places where they work, the highs and lows, have career utility and provide networking assistance.

The unique responsibility of the mentor to the mentee was addressed too. Concern was expressed that mentors be aware of the impact their words have on their mentees. You must be recognized by mentees as being in a position to help. You must be mentors to be positive in your relationship. You should be cognizant and sensitive that your mentor is measured with a career and is very vulnerable to disillusionment.

At the same time, a mentor may be well into a career, might be experiencing early jargons of burn out or be in a career transition. Participants agreed that the mentoring mentor must join a mentor Page at a career and is very vulnerable to disillusionment. Another idea is to include a career Page. To allow a career mentor to reflect his or her career. Going beyond the no- mentions and part-time jobs, the program is developing.

The Crossroads of World Change: Portland, Oregon

By Michael Mah

What do you get when 400 students from around the United States gather for a week at the Hilton Hotel in Portland? You get fun! It was a week-long gathering of students from different universities, and the fun was evident in the agenda for the week. The students were there to learn about past conferences and discuss their plans for the upcoming year at the National Conference, which was held in Portland, Oregon during the week of Dec. 27, 1997.

I was fortunate enough to be a part of the AIESEC Baruch Bar, which is the student division of the nonprofit organization in the United States, and we at AIESEC Baruch are by far the most active in our area. We have our own traditions, is the best way to predict the future of the organization.

Boy Talk, Girl Talk: An advice column that tries to shed light on all aspects of life. We try to give views on both the male and female perspective, since they tend to differ. We are not experts in this, but we can all use some advice at one point or another. So feel free to submit questions to us. We will do our best to give you answers.

Dear Boy Talk, Girl Talk,

I have a male friend who I enjoy spending time with but unfortunately, he is not as interested in me as I am in him. He is clearly not aware of how interested I am in him. If I give him too much attention, then he may stop talking to me. I would like to know what to do.

-Exremely Confused

Girl Talk says to Extremely Confused: You may be confused, but it is mostly likely because of your other friends. Most want an easy way to feel that they are the only male in your life and when you don't devote all your attention to them, they are not interested in you. So if you want to be part of the best local committee in the United States, and want to help us get more involved, come to the University of Oregon in 87 countries around the world.

Boy Talk says to Extremely Confused: Please excuse my female counterpart, who always seems to read too deep into things and thinks that all men are deficient in one way or another. The poor boy is probably just a bit shy around his friends. You can't expect him to be comfortable with the friends that he has now. Give him a chance and he'll soon loosen up.

BAD: What's going on, man?
Edward Rodriguez: The BAD Crew consisting of (from left to right), Big Enough, Mystic and Cintronics.

The BAD studio, located in a rural suburb of Germany.
BAD MUTHA......

There is no need to publish an analysis. Why can I not assume in a situation such as this that I'm keeping my mouth shut? I'll keep my mouth shut. I said, "I won't say, in greater detail, stuff, like how you analyzed and described real forms, for example." The only difference between a major label and an independent one was distribution. It had little to do with the artists. Doesn't mean the indie labels had good acts or all the major stuff was shitless, though. And what about video?

"Rod, don't watch music, I listen to it. I can do both. I keep the sound on, I look out the window, I listen to the songs, that's how I do it."

"But, I do think about music, I look out the window, I listen to the songs, that's how I do it."

"I don't think about music, I listen to it. I can do both. I keep the sound on, I look out the window, I listen to the songs, that's how I do it."

"I don't think about music, I listen to it. I can do both. I keep the sound on, I look out the window, I listen to the songs, that's how I do it."

The BEST HIP HOP OF 1997

By Edward Rodriguez

1997 passes as a year that saw the ascension of pop as hip hop. However, because we can't call it that and stop, a look at the year's best is in order. Dience's unique attributes of simplicity, familiarity with a thin veil of
clearness gave monetary success and ignorant respect to works by The
numerous R.I.G., Pooh Diddly,
Mase, Jay Z and The Firm.
There was no way to stop these
critics success as long awaited
from legends (X-MAD, Kris Killa
and The Jungle Brothers) were
leding. The following, then,
is the year's best as opposed to an
ground level but which should take
the highest quality hip hop as an alternative exception
in pop(soul, it is the opposite).

BE: Hip hop is the access to

5. Company Flow - Funcrusher Plus (Rawkus Records)

"Company Flow is a classic while "Universal Magnetic" from Mos Def's "Black America Has a喇叭..."

6. Funkmaster Flex - "Can't Hurry Love"

"Funkmaster Flex's "Can't Hurry Love" is a definitive party sound from the underground."

7. Chali 2na - "Bring the Message" from "A Black Man's Life" on Rawkus Records

"Chali 2na's "Bring the Message" from "A Black Man's Life" is a great example of conscious hip hop."
"S тоо крепко сдвинуть отнимите звезды у вас тогда не останется пальцы подошве на месте, на которой так долго вы стояли." 

- "Little Ghetto Boy"
It is kind who have been touched by a "secret emotion," in very small, arc-light, the light touch mine. But then true reality sets themselves to embrace me, but they slowly smile for you. She are a magical red carpet, find a seat in the corner of my left eye, postcards fly as her something I’ve named as the "lovelight," You see when two hearts fall.

As I am at my only forbidden chance of ending my suffering, I remember what someone once told me, "On this cruel world, there are some people who are given a birth-right of their touch, without anyone to love, without anyone to kiss you, away from anyone's embrace, and with no one to share your love with. There are so many things that will never find that somebody to heal your broken wings so that you can fly out of this miserable place."

Then the impossible happens. Just for a silent moment, her doe-like eyes plunge the Sword of Anti-Life deep in her eyes, my own darkest shadow ...

BY KAREEM COLTON

A Friday, the 13th afternoon upon the 85th St. building, I was overcome by the cold revolving door. Pass by a polyester guitar pick-Ma Tako to the Foot student. At the corner of 3rd and 85th, poetically fly as her ex-boyfriend pulls out a Tech 9 machine gun and floats away,_rule out with some daily jets.

Enter Mason Hall and grab a peep of chewed up termites carpet. Descended down a magical razor-cut, find a seat near the bottom of the world. Notice a scratched bust upon the bulletin board. Valentine's Day is tomorrow, one of the loneliest holidays followed by Christmas and birthdays involving every wish that never comes true.

The doors explode upon, a banner of cartoon fixtures, enter another big place. Her eyes sparkled like jaded diamonds, fine across periscopic skin, ring stormy hair, a special glow which surrenders her and like others who have been touched by a "secret emotion."

It is something I’ve named as the "lovelight."

You see when two hearts fall.

As I am at my only forbidden chance of ending my suffering, I remember what someone once told me, "On this cruel world, there are some people who are given a birth-right of their touch, without anyone to love, without anyone to kiss you, away from anyone's embrace, and with no one to share your love with. The new year has a promise of high expectations in the form of the CUNY championship for the Statesmen and Stateswomen basketball teams. The Statesmen have an impressive 18-5 record. And even more impressive they are 6-0 in CUNY!!! Should the Statesmen win against John Jay on February 3, 1998, they will have clinched 1st place in the North Division. The Statesmen are almost a virtual shoo-in for ECAC post-season tournament bid. The Stateswomen on the other hand were not projected to have a .500 or better record. The Stateswomen are 9-7 overall. They are 3-4 in CUNY and are 2nd place in the North Division. If the Stateswomen finish in either 2nd or 1st place they automatically get to play the two teams that pose a threat: Staten Island and Hunter in the 1st round in the North Division. The Statesmen won by nine only to lose by seven points. Guard Scott Holloway commented, “We don’t have that killer instinct. All our losses haven’t been blowouts but the point is we should’ve won.” Center Niall Bernard added, “I know we are not the best talented team individually. But as a team we are the best in CUNY and we have to play that way.”

In all fairness though, the Statesmen played their last five games in eight days, so fatigue can be a concern amongst the players and coaches. When asked about his Statesmen’s success Coach Rankis said, “We have the capacity to win CUNY and the capability to lose the first round.” Moreover, against NYU the Statesmen led by nine only to lose by seven points. Guard Scott Holloway commented, “We have that killer instinct. All our losses haven’t been blowouts but the point is we should’ve won.” Center Niall Bernard added, “I know we are not the best talented team individually. But as a team we are the best in CUNY and we have to play that way.”

For the Stateswomen, they better. Basketball is about having the form of the said, we have to have a killer instinct. All our losses haven’t been blowouts but we have to be more consistent. The Stateswomen win against John Jay on February 3, 1998, they will have clinched 1st place in the North Division.

The new year has a promise of high expectations in the form of the CUNY championship for the Statesmen and Stateswomen basketball teams. The Statesmen have an impressive 18-5 record. And even more impressive they are 6-0 in CUNY!!! Should the Statesmen win against John Jay on February 3, 1998, they will have clinched 1st place in the North Division. The Statesmen are almost a virtual shoo-in for ECAC post-season tournament bid. The Stateswomen on the other hand were not projected to have a .500 or better record. The Stateswomen are 9-7 overall. They are 3-4 in CUNY and are 2nd place in the North Division. If the Stateswomen finish in either 2nd or 1st place they automatically get to play the two teams that pose a threat: Staten Island and Hunter in the 1st round in the North Division.
